# III. BASIC INFORMATION ON THE CONSOLIDATED FINANCIAL STATEMENTS

#### **Basis of preparation**

The Consolidated Financial Statements have been prepared pursuant to § 55(5) of the Accounting Act of 29 September 1994, in accordance with the International Financial Reporting Standards (IFRS) approved for use by the European Union. The financial statements were prepared on the basis of the adopted accounting policies which were relevant to the conducted business activity and in accordance with International Financial Reporting Standards.

#### Representations of the Management Board

The Management Board represents that, to the best of its knowledge, the interim consolidated financial statements for the period from 01/01/2021 to 31/03/2021 and comparatives have been prepared in accordance with the applicable accounting policies, which give a true, fair and clear view of the financial and asset position.

These interim consolidated financial statements are not subject to audit by a statutory auditor.

#### Going concern

These interim consolidated financial statements have been prepared based on the assumption of continuing as a going concern in the foreseeable future. As of the day of presentation of these financial statements (excluding Expo Mazury S.A. w likwidacji) there are no circumstances indicating a threat to continuing as a going concern.

#### **Functional currency**

The reporting currency for the financial statements is the Polish zloty (PLN). The financial statements have been prepared in PLN thousand (PLN thousand), and all values, unless indicated otherwise, are given in PLN thousand. Any differences between the total amount and the sum of their components are due to rounding.

#### VIII. ACCOUNTING POLICIES APPLIED BY THE GROUP

#### Intangible assets

The Capital Group includes in intangible assets the assets which meet the following criteria: they may be excluded or separated from the business entity and sold, transferred, licensed or put to use for consideration to third parties, both individually and together with related contracts, components of assets or liabilities, or arise from contractual or other legal rights, regardless of whether they are transferable or separable from the business entity or from other rights or liabilities.

The initial recognition of a component of intangible assets is made according to their acquisition prices or cost of production.

The acquisition price includes the purchase price of an asset component (i.e. the amount due to the seller less deductible value added tax and excise tax), public and legal charges (in the case of imports) and expenditures directly attributable to the purchase and adaptation of the asset component for its intended use. Rebates and discounts granted by the seller and other similar reductions and recoveries reduce the acquisition price of an asset component.

If an intangible asset component is acquired in exchange for capital instruments of the Company preparing the financial statements, the acquisition price of an asset component corresponds to the fair value of the issued capital instruments, which equals the fair value of a given asset component.

In accordance with IAS, borrowing costs which are directly attributable to the acquisition, construction or production of an asset component are included in the acquisition price or production cost of that asset component.

At least as at the balance sheet date, intangible assets are measured at acquisition price or production cost less amortisation write-downs, as well as impairment losses.

If, at the time of preparing the financial statements, circumstances occurred which indicate that the balance-sheet value of assets may not be recoverable, the assets are reviewed for impairment. If there is any indication that an asset may be impaired and its balance-sheet value exceeds its estimated recoverable value, then the value of those assets or the cash-generating units to which they belong is reduced to the recoverable value. The recoverable value corresponds to the greater of the two amounts: the fair value decreased by costs of sale or the use value. When determining the use value, the estimated future cash flows are discounted to their present value using a gross discount rate which reflects current market assessments of the time value of money and the risks specific to the asset component. In the case of an asset component which does not generate cash inflows in a significantly independent manner, the recoverable value is determined for the cash-generating unit to which the component belongs. The revaluation write-downs under impairment losses are recognised in the income statement.

Amortisation write-downs of intangible assets are done by spreading their initial value over their estimated economic useful lives. Amortisation is made beginning from the first day of the month in which the intangible assets are accepted for use. Amortisation is interrupted at the end of the month in which the accumulated amortisation value equals the initial value or in which the intangible and legal asset component is to be liquidated, sold or found to be in short supply. Amortisation write-offs on intangible assets are recognised on a straight-line basis using the following rates:

| Item                    | Annual depreciation rate |
|-------------------------|--------------------------|
| computer software       | 5%-50%                   |
| other intangible assets | 20%-50%                  |

The correctness of the amortisation rates applied to individual intangible asset components shall be verified at least annually. Any changes resulting from the verification of amortisation rates affect (as a change of estimated values) the appropriate adjustment made in the amortisation write-downs for the current financial year and in subsequent financial years.

Intangible assets with indefinite useful lives and those not yet in use (in progress) are tested for impairment on an annual basis in relation to individual assets or at the level of a cash-generating unit. In the case of other intangible assets, an annual assessment is carried out whether there is any indication that their value may be impaired. Any possible revaluation write-downs are recognised in the profit or loss.

Except for development works, intangible assets generated by the entity itself are not included in assets, and expenditures incurred for their production are included in costs of the period in which they were incurred.

The cost of an intangible asset component (development work) comprises all costs incurred by the entity in the period in which it was constructed or adapted for use until its date of acceptance for use (or until the balance sheet date if the component is not yet available for use), including non-deductible VAT and excise taxes.

A given intangible asset item may be de-recognised from the balance sheet upon disposal or when no economic benefits are expected from the further use of such asset component. Gains or losses resulting from sale/liquidation or cessation of use of intangible assets are defined as the difference between sales revenue and the net value of these assets, and are recognised in the income statement.

#### Cost of research and development works

Research costs are recognised in the income statement when incurred. Expenditures incurred on development works performed as part of a given project are carried forward to the next period if it can be deemed that they will be recovered in the future. After the initial recognition of development expenditures, the historical cost model is applied, according to which asset components are recognised at acquisition prices less accumulated amortisation and accumulated impairment losses. Any expenditure carried forward is amortised over the estimated period in which it will generate revenue from the sale of a given project.

The costs of development works are assessed for possible impairment annually - if an asset has not yet been put into use, or more frequently - if during the reporting period there is an indication of impairment indicating that its balance sheet value may not be recoverable.

#### Goodwill

Goodwill under the acquisition of a business entity is initially recognised at acquisition cost, being the excess of the cost of business entities' merger over the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities. After initial recognition, goodwill is disclosed at acquisition cost less any accumulated impairment losses. Testing for impairment is carried out once a year or more frequently if there are indications of impairment. Goodwill is not subject to amortisation.

As at the acquisition date, the acquired goodwill is allocated to each of the cash-generating units which may benefit from the merger synergy. Impairment is determined by estimating the recoverable amount of a cash-generating unit to which goodwill relates. If the recoverable amount of a cash-generating unit is lower than its balance-sheet value, an impairment loss is recognised. An impairment loss is not reversed in a subsequent period. If goodwill forms part of a cash-generating unit and part of the operations within that unit is sold, then when determining the gain or loss on the sale of such operations, goodwill related to the operations sold is included in its balance-sheet value; in such circumstances, the goodwill sold is determined on the basis of the relative value of the activities sold and the value of the retained part of the cash-generating unit.

#### Property, plant and equipment

Tangible fixed assets are initially recognised at acquisition price or production cost. The acquisition price is increased by all costs directly related to the purchase and adjustment of the asset component to its usable condition. Costs incurred after the date of commissioning of a fixed asset, such as maintenance and repair costs, are recognised in the income statement at the moment they are incurred.

Fixed assets at the time of their acquisition are divided into components being items of significant value to which separate useful lives can be assigned. The costs of general overhauls, as well as significant spare parts and equipment, if used for a period longer than one year, are also included.

After initial recognition, tangible fixed assets are disclosed at acquisition cost or production price less accumulated amortisation and any revaluation write-downs under impairment losses.

In accordance with IAS 23, borrowing costs that are directly attributable to the acquisition, construction or production of an asset component are included in the acquisition price or production cost of that asset component.

Depreciation is calculated on a straight-line basis over the estimated useful life of a given asset component, and the amortisation rates for particular groups of tangible fixed assets are as follows:

| ltem  | Annual depreciation rate                           |
|---|--|
| Land (right of perpetual usufruct) Buildings and structures | is not depreciated 1.5% – 2.5%                     |
| Machines and technical equipment                            | 7% – 30%   |
| Means of transport  | 10-20%   |
| Investments in third-party fixed assets                     | in proportion to the useful life of the main asset |

Amortisation commences in the first monthly period following the month in which the asset is brought into use. The correctness of the applied amortisation rates is periodically verified (once a year), causing the adjustment of amortisation write-downs in subsequent years.

If, at the time of preparing the financial statements, circumstances occurred which indicate that the balance-sheet value of tangible fixed assets may not be recoverable, the assets are reviewed for impairment. If there is any indication that an asset may be impaired and its balance-sheet value

exceeds its estimated recoverable value, then the value of those assets or the cash-generating units to which they belong is reduced to the recoverable value. The recoverable value corresponds to the greater of the two amounts: the fair value decreased by costs of sale or the use value. When determining the use value, the estimated future cash flows are discounted to their present value using a gross discount rate which reflects current market assessments of the time value of money and the risks specific to the asset component. In the case of an asset component which does not generate cash inflows in a significantly independent manner, the recoverable value is determined for the cash-generating unit to which the component belongs. Revaluation write-downs under impairment losses are recognised in the income statement under "other operating costs".

An item of tangible fixed assets may be de-recognised from the balance sheet upon disposal or when no future economic benefits are expected from the further use of such asset component. Gains or losses resulting from sale/liquidation or cessation of use of fixed assets are defined as the difference between revenue from sale and the net value of these fixed assets and are recognised in the income statement.

Fixed assets under construction or assembly are disclosed at acquisition price or production cost. Fixed assets under construction are not amortised until their construction is completed and they are put to use.

In the case of permanent abandonment of expenditures for fixed assets under construction, all costs incurred in relation to the works performed so far shall be charged to the costs of the period. Investments may be suspended if there is a justified intention to continue such investments in subsequent periods. The investment is suspended based on the decision of the Company's Management Board. As at each balance-sheet date, expenditures on fixed assets under construction are subject to analysis regarding impairment and the necessity to make possible impairment write-downs.

Advance payments paid for the purchase of Tangible Fixed Assets are presented in the financial statements under other short-term receivables.

#### The right of perpetual usufruct of land

The right of perpetual usufruct of land acquired by way of an administrative decision is recognised in the balance sheet at fair value. The fair value of a right is deemed to be one of two values: its market value, if the Company has such information, or the value determined by an expert.

The excess of the fair value determined in this manner over the costs incurred to acquire the right of perpetual usufruct of land by way of an administrative decision is disclosed correspondingly in the "gain from previous years".

The right of perpetual usufruct of land acquired on the secondary market is measured at acquisition price and is not subject to revaluation.

The right of perpetual usufruct of land is amortised proportionally to the period for which it was granted.

#### Leasing

Financial lease contracts under which the carry-over takes place of substantially the entire risk and practically all benefits arising from the ownership of the subject of lease onto the lessee, are activated as at the date of the inception of lease according to the lower of the following two values: the fair value of the subject of lease, or the current value of minimum lease charges. The minimum lease charges are apportioned between the financial costs and reduction of the liability under leasing, so as to

produce a constant interest rate in relation to the remaining liability. Contingent lease payments are recognised as an expense in the period in which they are incurred.

Fixed assets used under finance lease agreements are depreciated according to the same rules as those applied to own assets. However, if it is not reasonably certain that the entity will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Lease contracts under which the lessor keeps substantially the entire risk and all benefits arising from the ownership of the subject of lease are classified as operating lease contracts. Lease rents under operating lease are recognised as the costs in the income statement with the straight-line method throughout the term of lease.

Assets leased under financial leases are presented in the balance sheet as receivables in the amount equal to the net investment. The net investment is the sum of the minimum lease payments due to the lessor under the finance lease agreement and any unguaranteed residual value attributed to the lessor discounted at the interest rate of the lease. Finance income arising from a finance lease of an asset is recognised in a manner that reflects a constant periodic rate of return on the net investment in the lease.

#### Non-renewable natural resources

Non-renewable natural resources are initially recognised at cost.

The purchase price is increased by all costs directly related to the purchase or adaptation of the asset for use.

Costs incurred after the date of including non-renewable natural resources in the records (use) are recognised in the income statement at the time they are incurred.

After initial recognition, non-renewable natural resources are carried at acquisition price or production cost less any accumulated amortisation and any accumulated revaluation write-downs under impairment losses. Depreciation is calculated naturally.

If, at the time of preparing the financial statements, circumstances occurred which indicate that the balance-sheet value of non-renewable natural resources may not be recoverable, the asset is reviewed for impairment. If there is any indication that an asset may be impaired and its balance-sheet value exceeds its estimated recoverable value, then the value of those assets or the cash-generating units to which they belong is reduced to the recoverable value. The recoverable value corresponds to the greater of the two amounts: the fair value decreased by costs of sale or the use value. When determining the use value, the estimated future cash flows are discounted to their present value using a gross discount rate which reflects current market assessments of the time value of money and the risks specific to the asset component. In the case of an asset component which does not generate cash inflows in a significantly independent manner, the recoverable value is determined for the cash-generating unit to which the component belongs. Revaluation write-downs under impairment losses are recognised in the income statement under "other operating costs".

An item of non-renewable natural resources may be de-recognised on disposal or when no future economic benefits are expected from further use of such asset component. Gains or losses resulting from sale/liquidation or cessation of use of non-renewable natural resources are defined as the difference between revenue from sale and the net value of these assets and are recognised in the gain and loss account.

#### Fixed assets and groups of assets held for sale

Fixed assets and groups of net assets are classified as held for sale if their balance sheet value will be recovered primarily as a result of a sale transaction and not as a result of their further use. This condition is considered to be met only if the asset component (or a group of net assets held for sale) is available for immediate sale in its present condition and a sale transaction is highly probable within one year from the moment of reclassification.

Fixed assets classified as held for sale and groups of net assets held for sale are measured at the lower of the two values: balance-sheet value or fair value less sale costs.

#### Simplifications applied to non-investment fixed assets

Depreciation (amortisation) of fixed assets and intangible assets with a low initial value (not exceeding PLN 10,000) is carried out in a simplified manner by making one-off write-downs of the entire initial value of such fixed assets.

The Group applies a simplification, according to which the moment of acceptance of a fixed asset for use, determined for the purpose of amortisation commencement, is assumed to be the first day of the month following the month in which the actual moment of acceptance of the fixed asset for use took place.

The Group applies simplification, according to which the moment of acceptance of an intangible asset for use, determined for the purpose of amortisation commencement, is assumed to be the first day of the month following the month in which the actual moment of acceptance of the intangible asset for use took place.

The verification of amortisation rates is considered to have been carried out when all fixed asset components with a net value exceeding PLN 50 thousand are included in the verification.

#### Investment property

Investment property means land and buildings and structures acquired for the purpose of deriving economic benefits from the increase in the value of these assets or from other benefits, e.g., revenue from rent. These assets are not used by the Group.

Investment real properties are initially measured at acquisition cost or production cost, including transaction costs. After initial recognition, investment real properties are measured at fair value. Gains or losses arising from changes in the fair value of investment property are recognised in the income statement in the period in which they arise. The fair value of investment property reflects market conditions as at the balance-sheet date.

#### Inventories

During the financial year, direct and indirect materials are recognised at acquisition price or purchase cost. Direct and indirect materials are distributed according to the FIFO method. The adopted purchase price may constitute the purchase price, provided that the costs incurred in connection with the purchase of materials constitute insignificant value in relation to the purchase cost. The purchase price of materials processed also includes storage costs necessary during the production process.

During the financial year, goods are recognised at acquisition price or purchase cost. The goods are distributed according to FIFO prices.

Land and property intended for resale, treated as goods, are recorded and spent according to the principle of detailed identification.

Finished products, semi-finished products and products in progress are measured according to actual costs incurred for the production of finished products.

In the case of development activities, all expenditures related to the execution of the task are capitalised in inventories as work in progress.

The acquisition price or production cost comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The inventory acquisition costs comprise the purchase price, import duties and other taxes (other than those subsequently recoverable by the Group from the tax authorities), transport, loading and unloading costs, and other costs directly attributable to the acquisition of finished goods, materials and services. Discounts, rebates and other similar items shall be deducted in determining purchase costs.

The expenditures incurred to complete the construction contract before the contract is entered into, provided that it is probable that they will be recovered, are also recognised as work in progress.

As at the balance-sheet date, inventories are measured at acquisition or purchase prices or production cost, however, not higher than their net selling price (net realisable value). Net realisable value is the difference between the estimated selling price in the ordinary course of business and the estimated costs of completion and the costs necessary to make the sale.

Revaluation write-downs of tangible current asset components, related to impairment or measurement as at the balance-sheet date are charged to other operating expenses. If the reason for making a revaluation write-down ceases to exist, the value of tangible current assets is credited to other operating income. Circumstances indicating the need to make a revaluation write-down on inventories include in particular:

- impairment of the value in use of inventories (destruction, overdue inventories),
- the balance of inventories exceeds the demand and the possibility of sale by the Company,
- low inventory turnover,
- the loss of market value due to lower sales prices of competitors.

As at the date, an ageing analysis of inventories is prepared, broken down by assortment, and the amount of revaluation write-downs is determined.

#### Receivables

Trade receivables and other receivables are recognised and disclosed at initially invoiced amounts. After the initial recognition, receivables are measured at amortised cost using the effective interest rate, taking into account revaluation write-downs on the value of receivables.

For trade receivables measured at amortised cost, the Group applies a simplified model to determine the expected impairment over the entire life cycle, using matrices of payment delays based on historical data, taking into account the requirements of the standard in relation to current and forecast economic conditions.

Receivables from customers are initially recognised at the transaction price. After the initial recognition, receivables are measured as follows:

 receivables not transferred to full factoring: in the amount of depreciated cost including write-downs for expected credit loss (however, receivables from customers with maturity below 12 months from the date of origin are not discounted),

 receivables transferred to full factoring: at fair value through profit or loss, but due to the short period of time between recognition of the receivables and their transfer to the factor and the low credit risk of the counterparty (factor), the fair value of these receivables is close to their carrying amount,

Receivables also include the un-invoiced portion of revenue which will arise from the estimation of the value of revenue under unfinished construction contracts and other long-term contracts.

#### Prepayments and accruals

In order to maintain matching of revenue and costs related to their achievement, costs and revenue related to particular reporting periods are separated. Prepaid expenses and costs, i.e. those related to future periods, are disclosed under prepayments, whereas accruals include amounts classified as costs of the current period, even though they will be covered in the future reporting period. Writedowns of deferrals or accruals of expenses are made on the time basis or on the basis of the amount of benefits. The time and the method of accruals and prepayments should depend on the nature of the accrued costs and subject to the prudence principle. The scope of typical expenditures settled over time includes in particular:

- prepaid press subscriptions,
- property insurance contributions,
- lease costs (rents),
- fees for occupation of roadway,

Items in the amount of probable liabilities related to the current reporting period are recognised in the accrual item.

#### Income accruals and prepayments

Income accruals and prepayments include mainly cash received to finance the acquisition of fixed assets under construction and intangible assets, which are accounted for in parallel with amortisation write-downs on fixed assets financed from such sources.

#### Financial instruments

Any contract that gives rise to a financial asset component of one party and a financial liability or capital instrument of the other party simultaneously is a financial instrument, provided that the contract between two or more parties has a clear economic effect.

The entity preparing the financial statements classifies the financial instruments into the following categories:

- financial asset components or financial liabilities measured at fair value through income statement - assets and liabilities acquired or incurred mainly for the purpose of selling or repurchasing them in the near term or being part of a portfolio of specific financial instruments which are managed together and for which there is evidence of a recent actual pattern of short-term gain taking;
- held-to-maturity investments non-derivative financial assets with fixed or determinable payments and fixed maturities, which the Capital Group has the positive intention and ability to hold to maturity;
- loans and receivables non-derivative financial assets with fixed or determinable payments that are not traded on an active market;
- financial assets available for sale non-derivative financial assets which have been

designated as available for sale or which are not loans and receivables, held-to-maturity investments or financial assets measured at fair value through financial result.

#### Recognition and de-recognition of a financial asset component and a financial liability

A financial asset or financial liability is disclosed on the balance sheet when it becomes a party to the contractual provisions of that instrument. Regular-way purchase and sale transactions of financial assets and financial liabilities are recognised on the date of the transaction.

A financial asset is de-recognised from the balance sheet when the rights to economic benefits and risks arising from the contract have been exercised, cancelled or have expired.

#### Measurement of financial instruments as at the day of their creation

As at the date of acquisition, financial assets and liabilities are measured by the Capital Group at fair value, i.e. most often at the fair value of the payment made in the case of an asset component or the amount received in the case of a liability.

The Capital Group includes the transaction costs in the initial value of measurement of all financial assets and liabilities, except for the category of assets and liabilities measured at fair value through income statement.

#### Measurement of financial instruments as at the balance-sheet date

The valuation of financial instruments as at the balance-sheet date is carried out as follows:

- at amortised cost, taking into account the effective interest rate: held-to-maturity investments, loans and receivables and other financial liabilities; measurement may also be performed at the value requiring payment if the discount effects are not significant;
- at fair value: financial assets and liabilities of the category measured at fair value through income statement and the category of financial assets available for sale.

The effects of measurement of financial assets available for sale are recognised in equity.

The effects of measurement of financial assets and liabilities classified into other categories are recognised in the income statement.

#### **Hedge accounting**

Derivative instruments hedging cash flows with a highly probable planned transaction are recognised at fair value taking into account changes in such value:

- in the part deemed to be an effective hedge directly in the equity,
- in the part deemed ineffective in the income statement.

Derivative instruments hedging the fair value of assets and liabilities are recognised at fair value. The effects of a change in the fair value of these instruments are recognised in the income statement.

### Discontinuation of hedge accounting

The person preparing financial statements ceases to apply hedge accounting to cash flows if:

 the hedging instrument expires, is sold, terminated or exercised. In such a case, the cumulative gain or loss on the hedging instrument which is recognised directly in equity

- shall remain separately recognised in equity until the planned transaction occurs;
- the hedge no longer meets the criteria for hedge accounting. In such a case, the cumulative gain or loss on the hedging instrument is recognised directly in equity until the planned transaction occurs;
- the planned transaction is no longer expected to be executed, therefore all accumulated gain or loss related to the hedging instrument, recognised directly in equity, is recognised in the income statement.

#### **Equity**

Equity is recognised in the accounting books with the division into types and according to the principles determined by the provisions of law and the provisions of the articles of association of the Group.

Capital from the sale of shares above their nominal value is created from the surplus of the issue price of shares, above their nominal value reduced by the costs of the issue. The costs of shares issue incurred at the establishment of a joint-stock company or increase in the initial capital reduce capital of the issue of shares above the nominal value of the surplus of the issue value over the nominal value of shares.

Undistributed financial result includes: amounts resulting from gain distribution, undistributed result from previous years, effects of errors from previous periods.

Minority capitals are a separate item of equity.

#### Bank credits and loans

All bank credits, loans and debt securities are initially recognised at their purchase price corresponding to the fair value of cash received, less costs related to obtaining a given credit or loan.

After initial recognition, interest-bearing credits, loans and debt securities are subsequently measured at adjusted acquisition price in the form of amortised cost, using the effective interest rate method. When calculating the adjusted purchase price, the costs related to obtaining a credit or loan, as well as discounts or premiums obtained at the settlement of the liability, shall be taken into account.

#### Liabilities

After initial recognition, all liabilities, except those measured at fair value, are measured, as a rule, at adjusted acquisition price using the effective interest rate method.

However, liabilities with a maturity of no more than 12 months after the balance-sheet date are not discounted.

Liabilities are presented in the financial statements divided into long-term and short-term liabilities. Moreover, liabilities towards related entities and liabilities towards other entities are separated.

Advances received from contractors for the provision of services are presented in the financial statements under the balance sheet item - short-term liabilities as advances received for deliveries. The commitments also include amounts relating to the settlement of construction and other long-term services.

Amounts retained by suppliers are disclosed separately in the financial statements.

#### Contingent liabilities

A contingent liability is a possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events, not wholly within the control of the Company, or a present obligation that arises from past events but is not recognised in the financial statements because:

- it is not probable that an outflow of resources containing economic benefits will be required to settle the obligations, or
- the amount of the obligation cannot be measured with sufficient reliability.

The identified contingent liabilities are subject to presentation in the financial statements in additional notes and explanations,

#### **Provisions**

Provisions are created when the person preparing the financial statements has a present obligation (legal or constructive) arising from past events and when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of that liability.

If the reporting entity expects that the costs covered by the provision will be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset component, but only if there is a sufficient assurance that the reimbursement will actually be made.

Costs related to a given provision are disclosed in the income statement, less all reimbursements.

The Group creates provisions for future warranty repairs by way of estimations based on past events related to expenses incurred on this account.

If the effect of the time value of money is material, the amount of provision is determined by discounting the forecast future cash flows to their present value using a gross discount rate reflecting current market estimates of the time value of money and the possible risks specific to the liability. If the discounting method is applied, an increase in the provision due to the passage of time is recognised as borrowing costs.

Reversal of unused provisions takes place on the day on which they turned out to be unnecessary. The liability for which the provision was created previously shall result in the use of the provision. The entity creates provisions for losses under construction contracts or similar contracts at the time of estimation of loss.

#### Provisions for employee benefits

The reporting entity creates a provision for the costs of accumulating paid absences, which it will have to incur as a result of the entitlement unused by the employees, and which accrued as at the balance-sheet date, as well as for retirement severance pay.

Provisions for unused leave are calculated on the basis of the actual number of days of unused leave in the current period, increased by the number of days of unused leave in previous periods. The provision for the cost of accumulating compensated absences is recognised after deducting any amounts already paid. The leave reserve is not discounted.

The provision for retirement severance pays is created on the basis of the number of employees and the number of years remaining until the date of retirement. The provision for retirement severance pays is subject to discounting.

#### Revenue

The amount of revenue is determined by the Entity according to the fair value of the payment received or due. The fair value of the consideration is determined by discounting all future cash inflows using the imputed interest rate. The imputed interest rate is most simply set at the interest rate for a similar financial instrument issued by an issuer of similar creditworthiness, or at the rate that discounts the nominal value of the financial instrument to the current cash selling price of the goods or service.

The difference between the nominal and fair value of receivables (discount) is recognised as costs of the activity to which the receivables relate.

The amount of revenue arising from a transaction is usually determined by contract between the Entity and the buyer or user of the asset component. It is measured at the fair value of the consideration paid, taking into account the amount of trade discounts and wholesale rebates granted by the Entity. When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue from the transaction is recognised based on the stage of completion of the transaction at the balance-sheet date. The result of a transaction can be reliably estimated if all of the following conditions are met:

- the amount of revenue can be measured reliably,
- it is probable that the economic benefits associated with the transaction will flow to the entity,
- the degree of execution of the transaction at the balance-sheet date can be determined reliably,
- the costs incurred in connection with the transaction and the costs of completing the transaction can be measured reliably.

The recognition of revenue by reference to the stage of completion of a transaction is often referred to as the percentage of completion method. Under this method, revenue is recognised in the periods in which the services are rendered. Revenue recognition based on this method provides useful information about the extent of service activities and their results for a given period. Revenue is recognised only when it is probable that the economic benefits associated with the transaction will flow to the entity. When there is uncertainty about the recoverability of an amount already included in revenue, the entity recognises the unrecoverable amount or the amount for which recovery has ceased to be probable as an expense, rather than as an adjustment of the amount of revenue originally recognised.

The person preparing the financial statements applies the completion method based on the ratio of costs incurred to total costs expected for the performance of a given service.

When the outcome of a transaction involving the rendering of services cannot be estimated reliably, revenue shall be recognised only to the extent of the expenses incurred that are expected to be recoverable. If the outcome of the transaction cannot be estimated reliably and it is not probable that the costs incurred will be recovered, revenue is not recognised and expenditure incurred is recognised as an expense. When the uncertainty which prevented the outcome of the contract from being estimated reliably has been removed, revenue from transactions shall be recognised on the basis of the stage of completion of the transaction at the balance-sheet date.

Interest income arising from an entity transferring an asset to another entity for use (e.g. a loan, financial lease) is recognised taking into account the effective interest rate.

Royalties (e.g. under licences or similar entitlements) are recognised on an accrual basis in accordance with the substance of the contracts entered into.

Dividends are recognised at the moment the entity's right to obtain them is established. Revenue from barter transactions is recognised only if it has an economic substance.

#### Costs

The entity preparing the financial statements recognises costs in accordance with the principle of matching revenue and costs and the precautionary principle.

Own cost of sales as at the balance-sheet date is adjusted by the change in the fair value of financial instruments which hedge cash flows when the transaction is no longer effective and when the hedged item is realised.

Costs are accounted for by cost centres and by nature, with the basic cost reporting format used in the income statement being the cost accounting format.

The total cost of products, goods and materials sold includes:

- production cost of products sold,
- production cost of services sold,
- value of goods and materials sold,

In addition, the costs of the reporting period, which affect the financial result, are other operating costs, related indirectly to the operating activity, including in particular:

- Overheads
- Cost of sales
- Loss on sale of tangible fixed assets and intangible assets
- Donations made
- Established provisions for disputes, penalties, damages and other costs indirectly related to operating activities, as well as financial costs related to financing the activity.

## Transactions in foreign currencies

Transactions expressed in currencies other than the Polish zloty are converted into Polish zlotys using the exchange rate in force on the date of the transaction or the exchange rate defined in the forward-type contract accompanying a given transaction.

As at the balance sheet date, monetary items expressed in currencies other than the Polish zloty are converted into the Polish zloty at the closing rate (spot rate) applicable at the end of the reporting period, i.e. the spot rate of exchange applicable at the balance-sheet date. Non-monetary balance sheet items denominated in foreign currencies are disclosed at the historical exchange rate as at the transaction date. Exchange differences resulting from such translation are disclosed under financial income or expenses or, in cases provided for in the accounting policies, capitalised in the value of assets, except for cash items constituting a hedge of exchange risk, which are recognised directly in capital in accordance with the cash flows hedge accounting policies.

The exchange rate applicable on the transaction date shall be the average exchange rate of the

National Bank of Poland (NBP) announced on the day preceding the transaction date.

Immediate realisation rate as at the balance sheet date shall be the average exchange rate of the NBP announced as at the balance-sheet date.

#### Income tax

Obligatory encumbrances on the result include: current tax and deferred tax. Current tax encumbrance is calculated based on the tax result (tax base) of a given financial year. The tax gain (loss) differs from the net book gain (loss) due to exemption of taxable revenue and costs constituting costs of obtaining revenue in subsequent years and cost and revenue items which will never be subject to taxation. Tax encumbrances are calculated using tax rates applicable for a given financial year.

Deferred tax is calculated using the balance sheet method as tax payable or refundable in the future. Deferred tax is calculated on the basis of differences between the balance-sheet values of assets and liabilities and the corresponding tax values used to calculate the tax base. Deferred tax provisions are created for all taxable temporary differences, whereas deferred tax asset components are recognised to the extent that it is probable that they will be available, against which the deductible temporary differences can be utilised against recognised future taxable gains. An asset component is also created on the basis of tax losses which can be settled and are carried forward, as well as unused tax exemptions.

The deferred income tax asset component and provisions may be offset when it is expected that the deferred tax asset component and provision will be realised in the same tax period.

An item of assets or a tax liability does not arise if the temporary difference results from goodwill or from the initial recognition of another asset component or liability in a transaction which does not affect either the tax result or the accounting result. Deferred tax liabilities are recognised for temporary differences arising from investments in subsidiaries, associates and joint ventures, unless the entity is able to control the timing of the reversal and it is probable that the reversal will not occur in the foreseeable future.

The value of a deferred tax asset is subject to analysis as at each balance-sheet date, and in the event that the expected future tax gains are not sufficient for the realisation of an asset component or a part thereof, it is written down. Deferred tax is calculated at tax rates which will apply at the moment when the asset item is realised or the liability becomes due. Deferred tax is recognised in the income statement, except to the extent that it relates to items recognised directly in equity. In the latter case, the deferred tax is also settled directly in equity.

#### Earnings per share (EPS)

Earnings per share are calculated by dividing the net gain for the period attributable to ordinary share holders by the weighted average number of shares outstanding during a given period.

Diluted earnings per share for each period are calculated by dividing the net gain for a given period adjusted for possible changes in gain resulting from the change of potential ordinary shares into ordinary shares by the adjusted weighted average number of ordinary shares.

## Mergers and consolidation

Subsidiaries are all economic entities (including structured entities) controlled by the Compiler of financial statements. The Compiler of financial statements controls an entity when it is exposed to, or

has the right to variable returns from, its involvement in that entity, and has the ability to influence those returns in its power over the entity. Subsidiaries are subject to full consolidation as of the date the control is transferred to the Group. Consolidation shall cease as from the date on which control ceases.

The Compiler of financial statements recognises business mergers using the purchase method. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities assumed from former owners of the acquiree and the capital interests issued by the group. The consideration transferred shall include the fair value of the asset or liability arising from the contingent consideration arrangement. Identifiable assets and liabilities acquired and contingent liabilities assumed in a business merger are initially measured at their acquisition-date fair values. As at the acquisition date, the Compiler of financial statements shall recognise all non-controlling interests in the acquiree, either at fair value or at the proportional share value (corresponding to the non-controlling share) in the acquiree's identifiable net assets. In the case of a business merger achieved in stages, the acquirer shall remeasure the balance sheet value of its previously held capital share in the acquiree at its acquisition-date fair value and recognise the resulting gain or loss. A contingent consideration that is classified as part of equity is not subject to a revaluation and its subsequent settlement is accounted for within equity. Intragroup transactions and settlements and unrealised gains arising from intragroup transactions shall be eliminated.

Changes in ownership interests in subsidiaries which do not result in a loss of control, transactions with non-controlling shareholders which do not cause the loss of control, are recognised as capital transactions, i.e. transactions with owners acting in their capacity as capital holders. The difference between the fair value of the consideration transferred and the share acquired in the balance sheet value of the subsidiary's net assets is recognised in equity. Gains or losses on sale of non-controlling interests are also recognised in equity.

Upon loss of control by the Group, any retained interest in the entity is measured at fair value as at the date of loss of control, with a change in the balance sheet value recognised in the financial result. Fair value constitutes the initial balance sheet value for the purpose of subsequent recognition of a retained interest as an associate, joint venture or financial asset component. In addition, any amounts previously recognised in other comprehensive income in respect of the entity are recognised as if the group had directly sold the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to the financial result.

Associates are all entities on which the Compiler of financial statements has significant influence, but which it does not control, which is usually the case when holding between 20% and 50% of the voting rights. Investments in associates measured are recognised using the equity method. Under this method, the investment in the associate is initially recognised at cost and the balance sheet value is increased or decreased to recognise the investor's share in the associate's results after the date of acquisition. The Group's investment in associates includes goodwill as at the acquisition date. If the ownership share in an associate is reduced but significant influence is retained, only the proportionate share of the amounts previously recognised in other comprehensive income is appropriately reclassified to the result. The share of the Compiler of financial statements in the financial result after the acquisition is recognised in the result report and its share in other comprehensive income after the acquisition is recognised in other comprehensive income together with an appropriate adjustment to the balance sheet value of the investment. When the Compiler of financial statements share in losses of an associate becomes equal to or greater than its share in that associate, including any other unsecured receivables, the reporting Compiler of financial statements shall de-recognise further losses unless it has assumed legal obligations or constructive obligations or made payments on behalf of the associate.

At each reporting date the Group determines whether there is objective evidence that an investment in an associate is impaired. If an impairment loss has been incurred, the Group calculates the amount of the impairment loss as the difference between the recoverable amount of the associate and its balance sheet value, and recognises that amount, in addition to its "share in the associate's gain/(loss)", in the result report.

A business merger under common control is a business merger in which all of the combining entities are ultimately controlled by the same party or parties both before and after the combination, and that control is not transitory. This applies in particular to transactions such as the transfer of companies or undertakings between Group entities or the merger of a parent and its subsidiary.

The Company applies the pooling of shares method to settle the effects of mergers between entities under common control.

## Principle of no-offsetting

This principle applies to the prohibition of offsetting assets and liabilities, unless IFRS requires or permits offsetting.

Income and expense items may be offset only when:

- offset is required by IFRS,
- Gains, losses and related costs arising from the same or similar transactions or events are not material.

The following transactions, presented by way of offsetting, are accepted by the Capital Group:

- gains and losses on the sale of fixed assets, including investments and assets used in operating activities, are recognised in the amount of the difference between the revenue earned on the sale and the balance sheet value of a given asset component plus selling expenses;
- expenditure related to the provision which is contractually reimbursed by a third party (e.g. supplier's guarantee) is offset against the corresponding amount of reimbursement;
- deferred income tax assets and liabilities are disclosed as surplus assets or provisions;
- advance payments received for the performance of work under construction contracts are
  offset against the value of revenue due under those contracts, provided that
  compensation is possible under the terms of the contract;
- gains and losses arising from a group of similar transactions are recognised in the net amount, e.g. foreign exchange difference gains and losses or gains and losses arising from the measurement of financial instruments held for trading and hedging recognised in the financial result, gains or losses arising from the discounting of long-term settlements;
- and liabilities under settlement of input VAT and due VAT, concerning future settlement periods.

#### **Cash-flow statement**

The cash flow statement is drawn up using the indirect method.

## Changes in principles, changes in estimates, errors of previous years

A change in accounting policies is made when the legal regulations concerning accounting are changed, and when this results in the increase of reliability of financial statements containing

information on the impact of transactions, other events and conditions on the financial position, financial result or cash flows.

In the case of changes in the accounting policy, it is assumed that the new accounting policies have always been applied. Related adjustments are shown as equity adjustments - in the item of gain/loss from previous years. In order to ensure comparability of data, the financial statements (comparable data) for previous years should be amended accordingly, so that the statements also reflect the changes made to accounting policies.

The items of the financial statements determined on the basis of estimates are subject to verification in the event of changes in the circumstances on which the estimates were based or as a result of obtaining new information or gaining greater experience.

Adjustment s caused by the removal of material errors from previous periods are charged to equity in the item of gains/losses from previous years. In preparing the financial statements, it is assumed that the error has already been corrected at the time of the occurrence of the error. This means that the amount of the adjustment relating to a prior period shall be included in the gain and loss account for that period.

#### **Exceptional items**

Exceptional items are disclosed separately in the financial statements when necessary for an understanding of the financial position and the results of the Compiler of financial statements. These are significant items of income or expense which have been separately disclosed because of the materiality of the amounts or the nature of the event.

#### **Business segments**

In accordance with the requirements of IFRS 8, the Group identifies operating segments on the basis of internal reports which are regularly verified by the Management Board in order to allocate resources to particular segments and assess the results of their activities.

Segment activities are assessed mainly on the basis of revenue and results at the EBIT level.

The following segments are identified within the group within which the entity operates:

| Construction and assembly activity | Real estate<br>development activity | Activity connected with lease of investment property | Exhibition and trade fair activity | Other |
|------------------------------------|-------------------------------------|--|------------------------------------|-------|
|------------------------------------|-------------------------------------|--|------------------------------------|-------|

To the Other group other ancillary activities are assigned which do not affect the assessment of the financial position of the entity. All assets and liabilities are assigned to the main activity segments.

## Items based on estimates and professional judgment

Lease contract classification - The Compiler of financial statements classifies leasing as an operating or finance lease based on an assessment of the extent to which risks and rewards incidental to ownership of the leased item are attributable to the lessor, and to which to the lessee. This assessment

is based on the substance of each transaction.

The Compiler of financial statements makes judgments as to whether the result of the construction contract can be estimated reliably. The assessment shall be based on an analysis of the likelihood of the economic benefits associated with a given contract. Revenue from the performance of construction contracts is determined proportionally to the degree of advancement, measured as the share of costs incurred from the date of contract conclusion to the date of revenue determination in the total costs of service provision. Contract budgets are subject to a formal updating process. If the stage of advancement of the service cannot be reliably determined as at the balance-sheet date, the revenue is determined at the amount of contract costs incurred, for which it is probable that they will be recovered.

The Compiler of financial statements assesses whether there is any indication that an asset is impaired. Impairment of an asset occurs when the balance sheet value of an asset or a cash-generating unit exceeds its recoverable amount, understood as the fair value less sales costs or the value in use of an asset component or cash-generating unit, whichever is higher. The assessment is based on the estimation of future cash inflows and outflows from the continuing use of the asset component and from its ultimate sale, and the application of an appropriate discount rate to these future cash inflows.

The Compiler of financial statements assesses whether there is any indication that shares (stocks) in subsidiaries are impaired. The impairment test for a cash-generating unit is based on the estimation of future discounted cash flows (DCF method) generated by the company. Similarly, goodwill is tested for impairment.

The Compiler of financial statements assesses the probability of payment of receivables by taking into account their past due date, collaterals established and the debtor's situation, on a transaction-by-transaction basis.

The entity preparing the financial statements makes judgments with respect to the expenditures necessary to fulfil a given obligation as at the balance-sheet date, related to the pending court disputes. The assessment is based on an estimate of the amount the entity would be required to pay to settle the obligation at the balance-sheet date.

The Compiler of financial statements recognises a deferred tax asset component on the basis of the assumption that taxable gain shall be achieved in the future, against which it can be utilised. A decrease in tax income in the future could make this assumption unjustified.

The Compiler of financial statements applies the method of percentage advancement of works in the settlement of long-term contracts. Application of this method requires the Entity to estimate the proportion of contract costs incurred to date to total estimated contract costs. In justified cases, when this method would not reliably reflect the stage of completion of the contract, another method may be applied, reliably reflecting the stage of completion of the contract.

Amortisation rates are determined based on the anticipated useful economic life of tangible fixed asset components and intangible assets. The useful economic lives are reviewed annually by the Entity based on current estimates.

The entity measures investment property at fair value using the DCF method based on estimation of future discounted cash flows.

# IX. CHANGES IN ACCOUNTING POLICIES AND PRESENTATION OF FINANCIAL STATEMENTS

In the current financial year, the Compiler of financial statements did not make any significant changes in the accounting policy, other than those required by law (significant changes, if any, described in a separate part of the statements), mainly resulting from changes in IFRS approved for use by the European Union.

# X. IMPACT ON THE FINANCIAL STATEMENTS OF CURRENT AND FUTURE CHANGES IN THE ACCOUNTING REGULATIONS.

| The following new standards and amendments to standards were issued by the IASB and approved for application in the EU and came into force on 1 January 2018   | Impact on financial statements / reference                       |
|--|--|
| IFRS 9 "Financial Instruments" - approved by the EU on 22 November 2016 (effective for annual periods beginning on or after 1 January 2018)  | had no significant impact on the financial statements            |
| IFRS 15 "Revenue from Contracts with Customers" and amendments to IFRS 15 "Effective Date of IFRS 15" - approved by the EU on 22 September 2016 (effective for annual periods beginning on or after 1 January 2018)  | had no significant impact on the financial statements            |
| Amendments to IFRS 2 "Financial Instruments" - Share-based payment classification and measurement (effective for annual periods beginning on or after 1 January 2018)  | had no significant impact on the financial statements            |
| Amendments to IFRS 4 "Insurance Contracts" - Application of IFRS 9 "Financial Instruments" together with IFRS 4 "Insurance Instruments" (effective for annual periods beginning on or after 1 January 2018 or at the moment of first application of IFRS 9 "Financial Instruments")  | had no significant impact on the financial statements            |
| Amendments to IFRS 15 "Revenue from Contracts with Customers" - Explanations to IFRS 15 "Revenue from Contracts with Customers" (effective for annual periods beginning on or after 1 January 2018)  | had no significant impact on the financial statements            |
| Amendments to IAS 7 "Statement of Cash Flows" - Initiative with respect to disclosures (effective for annual periods beginning on or after 1 January 2017)   | had no significant impact on the financial statements            |
| Amendments to IFRS 12 "Income Tax" - Recognition of deferred income tax assets from unrealised losses (effective for annual periods beginning on or after 01 January 2017)   | had no significant impact on the financial statements            |
| Amendments to IFRS 40 "Investment Real Property" - Carry-over of investment real property (effective for reporting periods commencing on or after 01 January 2018)   | had no significant impact on the financial statements            |
| Amendments to various standards "Improvements to IFRSs (2014-2016 cycle)" - changes made within the procedure of introducing annual amendments to IFRS (IFRS 1, IFRS 12 and IAS 28) aimed mainly at resolving inconsistencies and clarifying vocabulary (amendments to IFRS 12 are effective for annual periods beginning on or after 1 January 2017, and amendments to IFRS 1 and IAS 28 are effective for annual periods beginning on or after 1 January 2018) | had no significant impact on the financial statements            |
| IFRIC 22 Interpretation "Foreign Currency Transactions and Advance Payments" (applicable to annual periods beginning on or after 1 January 2018)   | had no significant impact on the financial statements            |
| Amendments to IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures" - Sale or contribution of assets between an investor and its associate or joint venture and subsequent amendments (the effective date of the changes was postponed until the completion of research on the equity method)  | will not have any significant impact on the financial statements |

| The following new standards, amendments to standards and new interpretations have been issued by the IASB and approved for application after 1 January 2019  | Impact on financial statements / reference                       |
|--|--|
| IFRS 16 "Leasing" (effective for reporting periods commencing on or after 1 January 2019)  | will not have any significant impact on the financial statements |
| Amendments to IAS 28: "Investments in Associates" - measurement of long-term investments   | will not have any significant impact on the financial statements |
| Annual amendment programme 2015 - 2017:  | will not have any significant impact on the financial statements |
| - Amendments to IFRS 3 "Entity Mergers" - measurement of interests in joint operations at the time of obtaining control $$   |  |
| - Amendments to IFRS 11 "Joint Arrangements" - measurement of interests in joint operations at the time of obtaining joint control   | will not have any significant impact on the financial statements |
| - Amendments to IAS 12 "Income Taxes" - recognition of tax consequences of dividend payments   | will not have any significant impact on the financial statements |
| - Amendments to IAS 23: "Borrowing Costs" - classification of liabilities incurred specifically to obtain a qualifying asset when the activities necessary to prepare the asset for use or sale are completed                    | will not have any significant impact on the financial statements |
| Amendments to IAS 19 "Employee Benefits" - amendments to a defined benefit plan  | will not have any significant impact on the financial statements |
| IFRIC 23 "Uncertainty Relating to the Recognition of Income Taxes"   | will not have any significant impact on the financial statements |
| The following new standards, amendments to standards and new interpretations have been issued by the IASB and approved for application after 1 January 2020  | Impact on financial statements / reference                       |
| Amendments to IFRS 9 "Financial Instruments", IAS 39 "Financial Instruments: Recognition and Measurement" and IFRS 7 "Financial Instruments: Disclosures" - reform of the reference interest rate                                | will not have any significant impact on the financial statements |
| Amendments to IFRS 16 "Leasing" in connection with COVID-19  | will not have any significant impact on the financial statements |
| Amendments to the scope of references to Conceptual Assumptions in IFRS  | will not have any significant impact on the financial statements |
| Amendments to IFRS 3: "Business Combinations" - definition of the project  | will not have any significant impact on the financial statements |
| Amendments to IAS 1 and IAS 8 - the definition of "significant"  | will not have any significant impact on the financial statements |
| The following new standards, amendments to standards and new interpretations have been issued by the IASB, not yet approved by the EU  | Impact on financial statements / reference                       |
| IFRS 17 "Insurance Contracts"  | will not have any significant impact on the financial statements |
| IFRS 14 "Regulatory Prepayments and Accruals"  | will not have any significant impact on the financial statements |
| Amendments to IAS 1 "Presentation of Financial Statements" - classification of liabilities as short-term or long-term - postponement of the effective date (effective for annual periods beginning on or after 01 January 2023); | will not have any significant impact on the financial statements |
| Amendments to IFRS 3 "Business Combinations", IAS 16 "Property, Plant and Equipment" and IAS 37 "Provisions, Contingent Liabilities and Contingent Assets" - effective for annual periods beginning on or after 1 January 2022   | will not have any significant impact on the financial statements |
| The 2018 - 2020 amendment cycle - effective for reporting periods beginning on or after 1 January 2021)  | will not have any significant impact on the financial statements |

# XI. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## Note 1 Property, plant and equipment

Neither in the current nor in the previous reporting period did MIRBUD S.A. have any investments in property. However, the company has a capital commitment in subsidiaries for which property investment is a significant part of the activities.

Estimated cash flows from these properties were part of the impairment test for capital investments in subsidiaries.

The increase in the value of investment real property as at 31/03/2021 was affected by the transaction concerning the purchase by Marywilska 44 sp. z o.o. from Expo Mazury S.A. w likwidacji of the remaining real property situated in Ostróda at ul. Grunwaldzka 55 and 55A, covering halls with a total area of 27.099 m² intended for warehousing and logistic operations. The real property included halls which previously constituted investment real properties (with a value of PLN 3,128 thousand), real

property constituting fixed assets (with a value of PLN 62,835 thousand) and other fixed assets (with a value of PLN 11,162 thousand). The transaction increased the value of investment real properties by PLN 76,928 thousand.

In addition, the following factors contribute to the value of investment real properties:

- a) purchase of 31/12/2020 by Marywilska 44 sp. z o.o. from Expo Mazury S.A. w likwidacji of the real property situated in Ostróda at ul. Grunwaldzka 55 covering halls with a total area of 29.625 m² intended for warehousing and logistic operations. The real property included halls which previously constituted investment real properties (with a value of PLN 36,637 thousand) and fixed assets (with a value of PLN 32,497 thousand). The transaction increased the value of investment real properties by PLN 43,336 thousand.
- b) recognition of an asset under the right to use land property located in Warsaw at ul. Marywilska 44 used on the basis of long-term lease contracts - recognition in accordance with IFRS 16 "Leasing" as at 31/03/2021 - PLN 136,999 thousand,

The amount of PLN 15 million disclosed in the consolidated financial statements relates to undeveloped land properties situated in Wola Pękoszewska, Skierniewice, at ul. Unii Europejskiej, and Rawa Mazowiecka, at ul. Biała.

In addition, the value of investment real properties includes:

- a) Shopping Centre building with a value of PLN 125 million,
- b) Wodny Park Handlowy building completed on 31/12/2017, with a value of PLN 28 million,
- c) apartments in Hel with a value of 9 million,
- d) Shopping Centre building in Rumia with a value of PLN 11 million,
- e) commercial building in Starachowice with a value of PLN 18 million,

IFRS 13 introduces a fair value determination hierarchy, based on three levels of obtaining input information. 3 levels of fair value determination hierarchy

Level one (I) contains input information from an active market and is treated as the source of most reliable data. Data from this level should be used whenever possible.

Level two (II) contains input information other than from an active market, which are however observable (objective, measurable). This level includes the following possible sources of information and data: quotations for similar assets and liabilities from an active market; quotations for the same or similar assets and liabilities from markets which are not active; markets other than quoted markets which are nevertheless observable (interest rates, credit spreads, etc.); other market-based information.

Level three (III) contains unobservable data used when information from the first two measurement levels cannot be obtained. This includes any measurements with subjective input data. IFRS 13 distinguishes three main fair value measurement methods: market approach; cost approach; flow approach.

The main component of intangible assets is the SAP system. The plan has a useful life of 20 years and its residual value is PLN 0.00.

Due to the ongoing process of winding up the operations of Expo Mazury sp. z o.o. w likwidacji, as at 31/12/2020 a revaluation write-down of PLN 8,517 thousand was made on goodwill.

Other goodwill has been allocated to the relevant activity segments as cash-generating units. The impairment tests carried out for these units, based on discounted cash flows, indicated that the recoverable value of these assets was higher than their book value.

Cash flows have been designed on the basis of historical data and the best management forecasts. The discount factors were selected on the basis of external sources and presented in the note corresponding to the report on activity segments.

# Note 4 Long-term financial assets (excluding trading receivables, assets measured using the equity method and cash and cash equivalents) and financial data of subsidiaries

Shares in other entities are initially recognised at fair value plus transaction costs. In later periods they are recognised at fair value.

After the initial recognition, the Group measures all investments in equity instruments at fair value. For all the investments being set, the Group chose the option to present gains and losses on changes in fair value of equity instruments in other comprehensive income. If such a choice is made, gains and losses on the change in fair value are not subsequently reclassified to profit or loss when the investment is no longer disclosed. Impairment write-downs (and reversals of write-downs) in respect of equity investments measured at fair value through other comprehensive income are not presented on other changes in fair value.

Dividends from such investments are recognised in profit or loss when the Company's right to receive payment is established.

## Revaluation write-downs in respect of credit losses.

The Company uses a simplified write-down matrix to calculate expected credit losses. In order to determine expected credit losses, trade receivables were grouped based on probability of credit risk characteristics and past due bands. The Company states that it has one hegemonic group of receivables.

The liability default rate was established on the basis of historical data from 2018 to 2020.

The recoverability is estimated on the basis of historical data as the balance includes a group of dispersed items grouped according to the probability of credit risk and customer behaviour in the past. A further adjustment is then made to take account of the impact of future factors not reflected in the historical data.

The liability default rate established as at 31/12/2020 is:

- for non-matured receivables 0.01%
- for receivables past due up to 1 month 0.02%
- for receivables past due from 1 month to 3 months 0.04%
- for receivables past due from 3 to 6 months 0.07%
- for receivables past due from 6 to 12 months 0.23%
- for receivables past due over 12 months 0.47%

As at 31/03/2021, the Group adopted the value of the write-down for possible credit risk based on the value as at 31/12/2020, i.e. in the amount of PLN 1,487 thousand.

## Note 7 Biological assets

Neither in the current nor in the previous reporting period did the item occur.

The term deposit in the amount of PLN 1,800 thousand constitutes interest-bearing funds used as hedging for the Marywilska 44 company's credit contract.

The amount of PLN 698 thousand stands for the credit hedging of the JHM Development SA registered office.

Term deposit in the amount of PLN 95 thousand constitutes interest-bearing funds securing the credit contract of the JHM 2 Sp. z o.o. company.

Term deposits in the amount of PLN 24,444 thousand available for the execution of infrastructural contracts - construction of a fragment of the A1 motorway and construction of a fragment of the S1 expressway (Węgierska Górka bypass).

Term deposits in the amount of PLN 21,729 thousand are interest-bearing cash constituting a hedge for proper execution of construction contracts, obtained from advances of MIRBUD S.A. investors.

Other cash assets are funds accumulated on individual housing accounts by purchasers of residential units for development investments in the course of construction. As a result, they are limited in their use.

write-downs for impairment of cash and cash equivalents have been determined individually for each balance relating to a given financial institution. External rankings of banks and publicly available information on the default rates for individual rankings were used to assess credit risk. The analysis showed that these assets have a low credit risk as at the reporting date. The Company used the simplification allowed by the standard and the impairment write-down determined on the basis of 12-months' credit losses.

#### Note 11 Fixed assets held for sale and liabilities related to them

Neither in the current nor in the previous reporting period did the item occur.

On 11 September 2019, the National Court Register - Register of Entrepreneurs registered the increase in the Company's share capital as a result of acquisition by eligible persons of 2,873,947 series J ordinary bearer shares. The Company informed about the indicated acquisition of shares and increase of the share capital in the current report No. 37/2019 of 12 July 2019. The share capital increase disclosed in the National Court Register took place as part of the conditional share capital increase, on the basis of the authorisation contained in Resolution No. 5/2019 of the Extraordinary General Meeting of 17 May 2019 and § 10A of the Company's Articles of Association. The amount of the share capital after the share capital increase was PLN 8,536,644.70 and was divided into 85,366,447 shares. The share capital disclosed in the National Court Register was divided into shares with a nominal value of PLN 0.10 each. The total number of votes resulting from all issued shares disclosed in the National Court Register was 85,366,447 votes at the General Meeting of Shareholders.

On 30 September 2019, 6,377,753 series K shares were registered by the National Depository for Securities and issued to the person who acquired the series K shares as part of the conditional capital increase by recording them on the securities account. In connection with the issuance of series K shares, the share capital was increased from PLN 8,536,644.70 to PLN 9,174,420, i.e. by PLN 637,775.30.

Following the issuance of series K shares, the Company's share capital is divided into 91,744,200 ordinary bearer shares with a nominal value of PLN 0.10 each, entitling to 91.744.200 votes at the General Meeting of Shareholders.

Pursuant to a resolution of 02/12/2020 (Notarial Deed Repository A No. 11976/2020) of the Extraordinary General Meeting of Shareholders of Marywilska 44 sp. z o.o. share capital of Marywilska 44 sp. z o.o. was increased by a contribution made by the parent company MIRBUD S.A.

As at 31/03/2021, MIRBUD S.A. made a payment of PLN 156,500 thousand to Marywilska 44 sp. z o.o.

Pursuant to the above resolution, the share capital of Marywilska 44 sp. z o.o. in 2021 shall be increased by PLN 78,250 thousand, increasing the number of shares by 1,565,000 pcs. The shares in

the increased share capital were fully covered with a cash contribution in the amount of PLN 156,500,000.00. The surplus over the total nominal value of the shares, in the amount of PLN 78,250 thousand, was transferred to the supplementary capital of Marywilska 44 Sp. z o.o. As of the date of approval of this report, the share capital increase has not been registered with the National Court Register.

#### B series bonds

On 14/08/2018, following the reduction of the subscriptions, the Management Board of JHM DEVELOPMENT S.A., by virtue of Resolution No. XVI/2018, allotted 10,500 B series ordinary bearer Bonds with a nominal value of PLN 1,000 each and a total nominal value of PLN 10.5 million. The issue price of the Bonds was equal to the nominal value. The Issue Day was 14/08/2018.

The Bonds were issued pursuant to the procedure specified in Article 33(2) of the Bond Act of 15 January 2015 and were addressed to no more than 149 individually designated addressees in a manner which does not constitute a public offering of bonds or a public bond offering referred to in Article 3 of the Act of 29 July 2005 on Public Offering, Conditions Governing the Introduction of Financial Instruments to Organised Trading, and Public Companies. Therefore, there was no requirement to draw up or make available to the public a prospectus or an information memorandum.

In order to hedge the Bonds, on 14/08/2018 the Issuer submitted a declaration on the establishment of hedging for the receivables under the Bonds in the form of a mortgage on the constructed premises, and the joint mortgage was registered by the court in the land and mortgage registers of the real properties hedging the Bonds.

The interest rate on the Bonds is variable, based on WIBOR 3M plus margin. Interest will be paid on a quarterly basis. The Bonds redemption date was set at 14/08/2021. The transferability of Bonds is not subject to any restrictions.

On 08/11/2018, the Issuer introduced B series Bonds to trading in the alternative trading system on the Catalyst market organised by the Warsaw Stock Exchange and BondSpot S.A.

The funds obtained by the Issuer from the issue of Bonds, minus costs and fees related to preparation and execution of the issue of Bonds, have been allocated for financing of conducted and planned development projects of the Issuer, including financing of land purchase for new development projects of the Issuer.

PLN 9.0 million was allocated for a development project in Łódź at ul. Jugosłowiańska, for the purchase of a building plot in Żyrardów at ul. Ks. J. Popiełuszki: PLN 914 thousand, and for payment for construction works in Katowice at ul. Pułaskiego: PLN 282

As at 31/12/2020, the Issuer made an early partial redemption of 9,059 B series bonds as part of the Bond Periodic Amortisation.

#### C series Bonds

On 30 June 2020, the Management Board of JHM DEVELOPMENT S.A. with its registered office in Skierniewice passed resolution No. X/2020 on the allocation of 7,000 C series unsecured bearer rate bonds with a nominal value of PLN 1,000 each and a total nominal value of PLN 7.0 million. The issue price of the Bonds is equal to the nominal value. The Issue Day was 30/06/2020.

The issue of the bonds was effected by means of a bid conducted pursuant to Article 1(4)(a) and (b) of Regulation 2017/1129 by addressing the Purchase Proposal to qualified investors and not more than 149 designated addressees who are natural or legal persons other than qualified investors within the meaning of Article 2(e) of Regulation 2017/1129, i.e. in a manner which constitutes a public bid for securities within the meaning of Article 2(d) of Regulation 2017/1129, for which there is no obligation to publish a prospectus.

The funds obtained by the Issuer from the issue of Bonds, minus costs and fees related to preparation and execution of the issue of Bonds, have been allocated for financing of conducted and planned development projects of the Issuer, including financing of land purchase for new development projects of the Issuer.

The interest rate on the bonds is variable, based on WIBOR 3M plus margin. Interest will be paid on a quarterly basis. On the interest payment dates falling in the 11th, 12th and 13th interest periods, the Issuer will be required to unconditionally partially redeem 25% of the total number of issued Bonds.

The final redemption date was set for 30/12/2023. The transferability of the bonds is not subject to any restrictions.

#### D series Bonds

On 14 October 2020, the Management Board of JHM DEVELOPMENT S.A. with its registered office in Skierniewice passed resolution No. XIV/2020 on the allocation of 5,070 D series unsecured bearer rate bonds with a nominal value of PLN 1,000 each and a total nominal value of PLN 5.07 million. The issue price of the Bonds is equal to the nominal value. The Issue Day was 16/10/2020.

The issue of the bonds was effected by means of a bid conducted pursuant to Article 1(4)(a) and (b) of Regulation 2017/1129 by addressing the Purchase Proposal to qualified investors and not more than 149 designated addressees who are natural or legal persons other than qualified investors within the meaning of Article 2(e) of Regulation 2017/1129, i.e. in a manner which constitutes a public bid for securities within the meaning of Article 2(d) of Regulation 2017/1129, for which there is no obligation to publish a prospectus.

The funds obtained by the Issuer from the issue of Bonds, minus costs and fees related to preparation and execution of the issue of Bonds, have been allocated for financing of conducted and planned development projects of the Issuer, including financing of land purchase for new development projects of the Issuer.

The interest rate on the bonds is variable, based on WIBOR 3M plus margin. Interest will be paid on a quarterly basis. On the interest payment dates falling in the 10th, 11th and 12th interest periods, the Issuer will be required to each time unconditionally partially redeem 25% of the total number of issued Bonds.

The final redemption date was set for 30/12/2023. The transferability of the bonds is not subject to any restrictions

In the construction industry there is a seasonality of annual sales resulting from the production processes taking place in the construction industry and from the cycle on the construction and assembly services market. Due to technological and atmospheric conditions, the majority of construction works are carried out in the period from March to November. Possible delays resulting from atmospheric conditions are assumed in the investment implementation schedules and do not threaten their timely completion.

### **Note 25 Operating segments**

The activity of the Compiler of the financial statements relates entirely to the territory of the country, therefore, no geographical segments are presented. In the Capital Group, where the Issuer is a parent, operating segments are distinguished. Within this division, the Issuer's activity is assigned to the construction and assembly services segment.

Other activities, which do not have a significant effect on the financial and asset situation of the Compiler of the financial statements, have been assigned to other items.

A decision was made to reorganise the Group and liquidate Expo Mazury S.A. w likwidacji. The exhibition and trade fair activity segment, in which Expo Mazury S.A. w likwidacji operates, did not bring or generate any result. This item showed the economic volumes resulting from renting commercial warehouse space to IKEA Industry. Revenue on this account in the comparative period was also recognised in this segment. As of 01/01/2021, the Group does not operate in this segment and the result obtained by Expo Mazury S.A. w likwidacji in Q1 2021 was mainly from the settlement of subsidies and was disclosed in the segment concerning other financial data.

Both in the current and the comparative period, there were no financial instruments measured at fair value.

### Note 29 Errors related to previous reporting periods

No material errors were found in the previous reporting period.

### Note 30 Transactions with non-controlling shareholders

This item does not exist.

### **Note 31 Business combinations**

There were no business mergers in the current period.

### Note 32 Significant planned capital expenditures

As at the date of approval of these financial statements for publication, no material capital expenditures were planned.

#### Note 33 Material events after the balance-sheet date

In the period between the end of the reporting period and the date of approval of these financial statements for publication, there were no significant events that would not be included in these financial statements.

#### **Note 34 Employment structure**

|  | full-time equivalent          |                                  |  |  |  |

### Note 35 Dividends declared and paid

Shares of all series are ordinary shares, one share entitles to one vote at the General Meeting of Shareholders. Shares of all series carry the same right to dividend and return on capital. As at the balance-sheet date, there were no dividend restrictions.

In the current and comparative period, the Issuer did not declare or pay any dividends. On 21 May 2021, the Issuer's Management Board submitted to the General Meeting of Shareholders a motion regarding distribution of profit for the financial year 2020, assuming allocation of the amount of PLN 5,504,652.00, i.e. PLN 0.06 per share, for dividend payment and excluding the remaining part of the profit from distribution and allocating it to the Company's supplementary capital.

By virtue of Resolution No. 3/2021 of 21 May 2021, the motion was considered positively by the Supervisory Board of MIRBUD S.A.

### Note 36 Effects of division, restructuring and discontinued activities

In the reporting period there were no changes regarding the merger of business entities, acquisition or sale of entities from the Issuer's capital group, long-term investments, division, restructuring or

discontinuation of activity.

### Risk related to the coronavirus pandemic

As at the date of publication of this report, according to the best knowledge of the Management Board of the Issuer, it is not possible to precisely determine the impact of the coronavirus epidemic on the activity of the Issuer and the capital group of the Issuer in the medium- and long-term perspective.

In the short-term perspective, it is possible that the further spread of the coronavirus epidemic will have a negative impact on the financial results of the Issuer and the Group due to the following circumstances:

- In the area of construction and assembly services, there are no delays in the execution of construction contracts due to the state of epidemic threat. However, it cannot be ruled out that, if this state continues, delays in the execution of contracts may occur due to so-called force majeure events, including delays connected with:
  - o lack of continuity in the supply chains for construction sites,
  - o disruptions to the continuity of projects' financing,
  - o absence of employees,
  - o subcontractors' delays,
  - o restrictions on the functioning of public authorities,
  - o decisions of the Contracting Authority or state administration to suspend the works,
  - o other events which are difficult to predict.

With regard to the current settlement period, the Management Board does not expect a significant effect of this risk on the profit or loss and equity of the Issuer.

- In the area of development activity, there are neither delays in the execution of contracts nor a significant decrease in the dynamics of sales of premises. However, if the state of epidemic threat continues, there may be negative financial consequences caused by:
  - o the drop in demand for premises,
  - o disruptions to projects' financing,
  - o general contractors' and subcontractors' delays.

With regard to the current settlement period, the Management Board of the Issuer predicts a possible effect of this risk on the profit or loss - a decrease by approx. 10%, no effect predicted on the Issuer's equity.

In the area of commercial space lease, there is significant, unfavourable impact of the state of epidemic threat, which affects the financial results of MARYWILSKA 44 Sp. z o.o.

With regard to the current settlement period, the Management Board of the Issuer predicts a possible effect of this risk on the profit or loss - a decrease by approx. 30%, no effect predicted on the Issuer's equity.

The Issuer reports that operations in all segments are, as a rule, conducted under continuous supervision. To the best knowledge of the Management Board of the Issuer, on the basis of the conducted analyses, the financial situation of the Issuer and the Group is stable.

The Management Board of the Issuer monitors the economic situation in Poland and worldwide on an ongoing basis, as well as the risks associated with the activities of the Issuer and individual companies in the Group. The Issuer indicates that, to the extent required by law, it will inform about new conditions having a significant impact on its operations, financial results and prospects of the Issuer and the capital group of the Issuer.

### Financial risk management

### Financial risk management

The management of the Group's financial resources assumes basing the Group's financing structure on long-term sources of financing. The Group Companies finance their operations in 70% based on foreign capital through:

- credits,
- loans,
- bonds,
- advances,
- leasing,
- factoring.

The Companies make efforts to diversify their third-party financing, both in terms of the financing institution and the financial products used. The Group's strategy provides for a further gradual exchange of short-term debt financing individual construction contracts for long-term debt financing in the coming years, and for a gradual reduction of debt in the long-term perspective.

Monitoring of the effectiveness of financial resources management is carried out, among others, using the following ratios:

Debt ratio = Total liabilities/ Assets

Long-term debt ratio = Long-term liabilities / Assets

Short-term debt ratio = Short-term liabilities / Assets

Debt to equity ratio = Liabilities / Equity

While conducting business activity, the Group is exposed to the following risks: credit risk, currency risk, interest rate risk, liquidity risk.

### Credit risk management

Credit risk results from the balances of trade receivables of loans and cash and cash equivalents. The customers of the Company's services are domestic entities. The customers of products and services provided by MIRBUD S.A. can be divided into two groups:

- commercial entities,
- entities subject to the provisions of the Public Procurement Law.

With regard to commercial customers, the Company manages the credit risk and analyses it for each new customer before concluding a contract, among others, by using reports from business intelligence agencies and the contractor's documentation of the source of financing for the construction contract.

With respect to entities subject to the provisions of the Public Procurement Law (e.g. GDDKiA, Self-governments), due to the obligation of these entities to budget the costs of the concluded construction works contract in advance, the credit risk is, according to the Management Board, negligible. The Company maintains deposits - deposits in financial institutions, which have a high credit rating.

### Liquidity risk management

The Parent Management Board is responsible for managing financial liquidity in the Group. The main objectives of the Group's financial resources and liquidity management are as follows:

ensuring stable and effective financing of the Group's operations,

- continuous monitoring of the Group's debt level,
- effective management of working capital,
- the Parent's coordination of liquidity management processes at the Group Companies.

The Company manages the liquidity risk by maintaining sufficient cash, the possibility of financing with bank credits and maintaining sufficient credit lines to repay liabilities as they become due.

The Company's liquidity management includes projecting cash flows for all currencies and analysing what level of liquid assets is needed to repay liabilities.

Note 14 contains an analysis of the Company's (Group's) liabilities, in relevant age brackets, based on the contractual maturity date.

Monitoring of the effectiveness of liquidity management is carried out, among others, using the following ratios:

#### Current liquidity ratio = Current assets / Short-term liabilities

Accelerated liquidity ratio = (Current assets - Inventories - Short-term prepayments) / Short-term liabilities

Cash liquidity ratio = Cash / Short-term liabilities

#### Risk of significant changes in interest rates

The Group Companies to a large extent use bank credits to finance their investment activities. The costs of interest on credits are affected by the amount of the WIBOR base rate for credits taken out in Polish zlotys and EURIBOR for credits in EURO. An increase in the value of WIBOR/EURIBOR indices through an increase in interest on loans may have an adverse effect on the Company's financial situation. If a risk of changes in interest rates is identified. In the case of long-term financing, the Company's Management Board always considers the possibility of concluding interest rate hedging transactions (interest rate swaps - IRS strategy, CIRS).

As at 31/03/2021, JHM2 sp. z o.o. and Kobylarnia S.A. entered into interest rate hedging transactions for long-term credits in PLN within the MIRBUD Capital Group. The hedged level of the WIBOR rate is between 1.80 p.p. and 2.05 p.p.

#### Risk of changes in interest rates - sensitivity to changes

In order to carry out a sensitivity analysis for interest rate changes, on the basis of historical changes in value and on the basis of the Company's knowledge and experience of financial markets, reasonably possible interest rate changes were estimated at the level of - 1.0/+1.0 percentage point for the Polish zloty and the Euro.

The effect of the change in interest rates on the net result and the balance sheet total as at 31 March 2021 and 31 December 2020 is presented below.

| Sensitivity analysis for items exposed to change in interest rates |                | Effect on ne   | et gain/(loss) | Effect on the balance sheet total |                |
|--|----------------|----------------|----------------|-----------------------------------|----------------|
|  | As at:         | increase by 1% | decrease by 1% | increase by 1%                    | decrease by 1% |
|  | 31/03/2021     | increase by 1% |                | increase by 176                   |                |
| Liabilities under credits and loans                                | 360,103        | -2,917         | 2,917          | 3,601                             | -3,601         |
| Loans granted  |                |                |                |                                   |                |

| Other financial liabilities  |            |   |                 |                 |                  |
| <u>Total</u>   | 372,795    | -3,020  | 3,020           | 3,728           | -3,728           |

#### Risk of changes in foreign exchange rates

Within the MIRBUD Group, only MIRBUD S.A. generates revenue in foreign currency. In 2021, MIRBUD S.A. generated over 12% of revenue in EUR and was exposed to the exchange rate risk, which could reduce the effectiveness of construction contracts and may affect the amount of revenue and gains. In order to minimise the exchange rate risk, the Company hedges the exchange rate level by entering into FORWARD-type transactions. In 2021, the Issuer hedged on average approx. 50% of its foreign currency revenue with forward currency sales transactions.

## Risk of changes in interest rates - sensitivity to changes

In order to carry out the analysis of sensitivity to changes in exchange rates, based on historical changes in value and on the Company's knowledge and experience of financial markets, the changes in exchange rates which are "realistically possible" were estimated at the level of -10%/+10% as at 31 March 2021 and 31 December 2020.

The table below shows the sensitivity of the net financial result to reasonably possible changes in exchange rates, assuming that other factors remain unchanged.

| Items exposed to  | EUR    |        | U      | USD    |        | Other  |  |

The Issuer's Management Board estimates that in 2021 the share of revenue in the Euro currency will change and shift to the level of approx. 12% of the total sales revenue. As at 31/03/2021, the Issuer had approx. 50% of its estimated foreign currency revenue hedged against exchange risk.

# - related to restrictions in the banks' credit policy, in particular with respect to granting investment and mortgage credits

At present, banks in Poland, acting on the basis of EU directives, maintain tightened credit policy both towards companies operating in the development sector and towards people applying for mortgage credits.

Due to the unstable economic situation resulting from the COVID-19 virus pandemic, financial institutions are further tightening credit policies.

When planning subsequent projects, the Capital Group Companies try to take into account the market situation by adapting their portfolio to the expected financial and credit capabilities of potential customers.

The introduction of any restrictions towards the availability of credits may have a material and adverse effect on the Companies' activities, financial situation and their development prospects.

#### Risk related to the general macroeconomic situation and economic situation in Poland

## - change in the macroeconomic situation and economic downturn in Poland

Revenue of the MIRBUD Group Companies are earned entirely on account of conducting business activity on the Polish market. Therefore, the financial results achieved depend on factors such as the

stability of the macroeconomic situation in Poland and the general economic situation in the country in a given period. In particular, the development of the following macroeconomic and economic indicators has or may have an effect on the financial results achieved by the Group Companies and the entire development industry: the level of GDP growth rate, unemployment rate, inflation rate, real remuneration growth rate, investment level, household income level, reference interest rates, exchange rates and budget deficit.

Possible negative changes in the stability of the macroeconomic situation and general economic situation of Poland may have a negative impact on the activity, financial situation or development prospects of the Group Companies.

#### - in the construction industry

The activities of the Group companies are closely correlated with the overall economic situation in Poland. The financial results achieved by the Company are most affected by the level of investments in enterprises, GDP growth rate, inflation rate, value of construction and assembly production, tax policy and increase in interest rates. There is a risk that negative changes in the above mentioned ratios, in particular the slowdown in the economic growth rate, the increase in the inflation rate caused by the increase in the prices of materials or the increase in interest rates, may have a negative impact on the activity and results of the Group Companies.

In order to minimise downturn fluctuations, the Issuer enters into long-term construction contracts with public Contracting Authorities in order to ensure stable sources of revenue over a period of 2 to 3 years.

#### - in the development industry

The situation on the development market in Poland in the period covered by these financial statements affects the operations and financial results of the Group, however, it should be remembered that the economic situation in the development industry is characterised by cyclicality. The current economic situation in the development industry is influenced by low interest rates on mortgages, which, however, are accompanied by the maintenance of a tightened policy of many banks on granting mortgages. As a result of this approach, many potential customers of the developers are not able to obtain the necessary credit to purchase an apartment on reasonable terms.

The downturn in the development industry is influenced by the costs of materials and labour in the construction industry. The recent increase in prices of materials and costs of general contracting services may translate into such a level of increase in apartment prices that it will cause a downturn cooling on the primary market.

The occurrence in the future of financial and economic crises, recessions or periods of economic slowdown or other factors adversely affecting the development industry may have a material and adverse impact on the Group's activities, results, financial situation or development prospects.

# - purchase of land for new development projects and investment projects for lease of commercial space

The further successful development of development activities and the construction and letting of commercial premises depend on the ability to purchase plots of land in attractive locations and at prices which enable satisfactory margins to be realised. Due to the limited number of attractive plots available with the desired design parameters, the Companies cannot guarantee that in the future it will be possible to purchase a sufficient number of attractive plots to implement the assumed development plans.

Moreover, the possibility to purchase attractive plots of land for new development projects and commercial and service projects depends on a number of factors, such as:

the existence of local land-use plans,

- the ability to finance the purchase of plots and start the investment process,
- the possibility of obtaining the required administrative approvals to start implementation of the projects (development conditions, architectural design approval),
- the possibility of ensuring the required own contribution and obtaining bank financing for the implementation of projects.

The above factors depend to a large extent on the overall situation on the property market in Poland and on local markets, as well as on the general economic situation of the country.

#### - sudden changes in housing prices

JHM DEVELOPMENT S.A. derives its revenue from development activities from the sale of flats and single-family houses. Due to the fact that development projects are carried out in a long-term perspective and it is often necessary to assume sale prices of constructed property several years in advance, there is a risk that during the project implementation significant changes will occur in the prices of flats and houses on a given market, including significant drops in the prices of residential units and houses. Property prices in a given market depend on a number of factors, such as the general economic situation of a region, the level of unemployment, the number of residential units available for sale by other developers in that market, the availability of mortgage loans to potential customers, etc. In the event of a significant fall in property prices, the Company may not be able to sell the constructed apartments and houses at the planned prices within a specified period of time. The occurrence of any factors which will cause the prices of apartments or houses to fall on the markets where the Companies execute projects, may have a material and adverse effect on their operations, financial situation or the Group's development prospects.

#### - in the sector of shopping hall management and lease of commercial space

Apart from development activities, an important area of the Group's activity is management of shopping halls and lease of commercial space. These activities are carried out by the following subsidiaries: Marywilska 44, JHM 1 Sp. z o.o. and JHM 2 Sp. z o.o. The level of commercial activity and the demand for lease of commercial space in the given shopping halls depends on the general macroeconomic situation in a given market, the level of competition and the level of consumption, and in particular the demand for products from the popular segment in a given market.

The occurrence in the future of factors negatively affecting the economic situation of the sector of shopping hall management and commercial space lease may have a material and adverse impact on the Group's activities, results, financial situation or development prospects.

#### Risks related to competition:

#### - in the construction industry

The economic growth in Poland and the accumulation of many construction investments at the same time, both infrastructural and volumetric, translates into limited availability of materials and services of subcontractors, which causes an increase in prices and intensifies competition by offering the most convenient payment terms for suppliers and subcontractors.

Further intensification of competition on the markets where the Company operates may have a material adverse effect on the Company's operations, results and financial position as well as on its future development outlook.

The Management Boards of the Companies, based on many years of experience, try to build a portfolio of contracts that will enable them to achieve an appropriate financial result.

#### - in the development industry

The regions of the country in which the Group operates are characterised by a high degree of

competition in the development industry. JHM DEVELOPMENT S.A. takes into account the intensity of competition on local markets where the start of development activities or the implementation of further projects is considered. As a rule, the Company focuses on locations where competition is limited. The existence of limited competition at the time when the investment is considered to commence does not mean, however, that competitive entities will not undertake investments in the same local market as the Company in the near future, after the commencement of preparations or work by the Company. Both relatively small local companies and larger developers competing with the Company are capable of comprehensive implementation of large projects.

In line with the adopted strategy of the Company, gradual entry into the large cities' housing markets is associated with the struggle with much stronger competition operating in these markets.

The intensification of competition may translate into an increase in the supply of finished apartments offered on the local market, which may result in price pressure when selling premises, a reduction in rental rates of premises, as well as an extension of the period of their sale.

The existence or intensification of competition on the markets where the Companies operate may also translate into difficulties in obtaining attractive plots of land for new development and commercial projects at the assumed prices.

The intensification of competition in the markets where the Company operates may have a material and adverse effect on its operations, results, financial situation or its future development outlook.

#### - for the activity of managed shopping halls and lease of commercial space

The shopping halls managed by the subsidiary Marywilska 44 are one of the largest shopping hall complexes in Poland and the largest in the capital city of Warsaw.

The basic assortment offered to customers in shopping halls at ul. Marywilska 44 consists of clothes, footwear, leather goods and toys in the popular segment. Traders specialising in the sale of the above articles in the popular segment can choose from a wide range of entities offering lease of commercial space in Warsaw and its vicinity, including large shopping halls located in the vicinity of Nadarzyn and in Wólka Kosowska. Additionally, it cannot be excluded that in the future other entities will not build large shopping hall complexes, which will compete directly with the halls at ul. Marywilska 44 within the Capital City of Warsaw.

The subsidiaries, JHM 1 Sp. z o.o. and JHM 2 Sp. z o.o., are exposed to the same risk.

The risk of commercial space lease activity in the field of warehouses and logistics halls located in Ostróda managed by Marywilska 44 depends on the stability of the macroeconomic situation and the general economic situation in Poland, as well as competition in the industry.

The intensification of competition in the markets where the Group operates may have a material and adverse effect on the Group's activities, results, financial situation and future development outlook.

## **External legal risks**

#### - changes in provisions of law, in particular tax law

The Polish legal system is characterised by a considerable degree of variability and ambiguity of provisions, which applies in particular to tax law. In practice, there are often problems with interpretation, inconsistent court rulings occur, as well as situations when public administration bodies adopt interpretations of legal provision which are unfavourable for the taxpayer and different from the interpretations previously adopted by these bodies. The occurrence of changes in legal regulations, including those concerning environmental protection, labour law, social security law, commercial law,

and in particular tax law, may have an adverse effect on the Group's Companies' operations, financial situation or its development prospects.

# - related to non-compliance with legal requirements envisaged for the commencement of the investment and with the legal status of the property

The implementation of each of the investment projects by the Company requires the fulfilment of the requirements set forth in the law. In most cases, the Company is obliged to obtain various types of permits, which are issued by public administration bodies. Obtaining these administrative acts is a necessary condition for the commencement of the investment process. It should be noted that obtaining all permits and consents requires considerable effort and time. Public administration bodies issuing permits and consents operate on the basis of the provisions of the Code of Administrative Procedure and special acts. In these proceedings, the interest of local communities is taken into account in the first place and a number of planning issues are subject to wide public consultation (e.g. environmental issues). Additionally, lack of even a part of the documentation makes it impossible to commence the investment process. Moreover, the discovery of any misstatements, either on the part of the Company or in the administrative files, and in particular the existence of any contradictions between them may lead to the delay in the commencement of the investment process. There is also a risk that the already valid administrative decisions will be challenged by resuming proceedings or annulling decisions. Administrative decisions may also be challenged, in whole or in part, and consequently there is a risk that they will be annulled. In areas where local land-use plans have not been adopted, there is also a risk that the Companies will not be able to implement their plans due to difficulties related to the possibility of obtaining a development conditions' decision.

The occurrence of any of the aforementioned factors may have an adverse effect on the Group's activities, financial position or its development prospects.

#### Risks related to the current activities

#### Risk associated with the implementation of the development strategy

The Polish market and the situation on local markets where the Group operates are subject to constant changes, the direction and intensity of which depend on a number of factors. Therefore, the Companies' future financial performance, development and market position depend on its ability to develop and implement a long-term strategy in an uncertain and changing market environment.

In particular, the implementation of the Group's strategy depends on the occurrence of a number of factors, the occurrence of which is often independent of the decisions of the Group's governing bodies, and which cannot always be predicted.

Such factors also include those of a general nature, such as:

- unpredictable market events, such as the occurrence of an economic crisis or recession in Poland or other European Union countries,
- radical and sudden changes in legal regulations or the methods of their interpretation (e.g. influencing the issuance of development conditions),
- natural disasters, epidemics in the areas where the Company operates, as well as a number of specific factors, such as:
- restrictions on the possibility of JHM DEVELOPMENT acquiring plots of land in attractive locations for housing development,
- reduced availability of bank financing for development and commercial projects,
- failure to implement development projects and commercial and service projects in accordance with the assumed schedule and cost estimate,
- changes in government programmes supporting the purchase of residential units by persons with average and below-average income,

other operational risks described in these statements.

The Group Companies make every effort to ensure that the assumed strategy is implemented and try to analyse on an ongoing basis all market and industry factors which have and may have an impact on the implementation of the strategy,

The factors described above may cause that the Group will not be able to implement the assumed development strategy, including the planned development projects, and therefore these factors may have a significant negative impact on the Company's activities, financial position, results or its development prospects.

#### - related to financing development with bank credits

The Group Companies finance their development and current activities with the use of bank credits and leasing. In the future, the Companies intend to use bank credits to finance the demand for working capital related to the increase in the scale of activities. However, there is a risk that in the future, in the event of adverse changes in the Companies activity markets or financial markets, or as a result of a change in the banks' approach to credit risk assessment, they will have difficult access to financing using credits, their cost will be higher than the current one, or they will be forced to repay or refinance their existing debt on worse terms. This may contribute to a slower than planned growth rate and deterioration of the financial results obtained.

The Management Board considers the current level of debt to be safe and does not see any threats to its timely service. Despite the good financial standing of most of the Group's companies, it cannot be ruled out that in the future, as a result of unfavourable market processes, they will be unable to meet all their obligations resulting from credit contracts and loans. In the event of a situation where the Company of the Group is not able to settle its debts under credit contracts and loans on an ongoing basis, repayments may become due and payable immediately. As a result, in order to satisfy its creditors, the Company will be forced to sell a part of its assets. The strategies of the Companies provide for a gradual exchange of short-term debt for long-term financing and that the newly acquired credit financing will be appropriate for the implementation of specific construction contracts and developer investments.

The occurrence of the aforementioned factors may have an adverse effect on the Group's activities, financial position or its development prospects. In order to limit the risk, the Company performs on an ongoing basis an analysis of debt and the possibility of settling liabilities.

## - related to the building infrastructure

The completion of the project depends on the provision of the infrastructure required by the regulations, such as access to public roads, access to utilities, designation of appropriate internal roads, etc. There may be situations where the provision of the necessary infrastructure depends on factors beyond the Company's control. Often the provision of access to the right road or utilities depends on the decision of the appropriate municipal or local authority. In some cases, the status of the roads needed for the investment may be unregulated or unforeseen complications may arise during project implementation, resulting in delays and additional costs. It may also happen that the relevant administrative bodies require the Company to perform additional infrastructure works as part of the investment project. The authorities may also expect or even demand that the investor performs infrastructure works which are not necessary from the perspective of the project implementation, but which may be expected by the authorities as an investor's contribution to the development of the local community in connection with the investment.

The occurrence of any of the above factors, translating into delays in the implementation of projects or additional project costs, may have a material and adverse effect on the Group's activities, financial situation or its development prospects.

#### - related to liability for breach of environmental regulations

Pursuant to the applicable environmental protection regulations, entities which are owners or users of plots where hazardous substances are present, or where there has been an adverse transformation of the natural configuration of the land, may be required to remove them, or bear the cost of land reclamation or pay a fine. In order to minimise the risk of breaching environmental regulations, the Companies carry out technical analyses of future projects in terms of the risk related to liability for breach of environmental regulations. Until the date of preparing the statements, the Companies were not obliged to bear the costs of land reclamation or to pay any administrative penalties for this. However, it cannot be precluded that in the future the Group Companies will be obliged to bear the costs of land reclamation, pay a fine for breach of environmental protection regulations, or pay damages.

The occurrence of any of the aforementioned factors may have an adverse effect on the Group's activities, financial position or its development prospects.

#### - related to penalties for non-performance or untimely performance of orders

Entities act as a general contractor in contracts with investors. The signed and executed contracts impose a number of obligations on the Companies and determine the consequences of non-performance of the assumed obligations. Such contracts, first of all, very precisely specify the deadlines - both for the performance of the ordered works, as well as the performance of other activities, e.g. removal of possible defects during the warranty period. If these deadlines are not met, the Companies may be at risk of paying contractual penalties.

In order to limit the risk of investors making a claim for payment for non-performance or improper performance of the Company's orders, the Company has taken the following actions:

- provision of insurance coverage for contracts, including activities of the subcontractors,
- implementation and application of the Management System according to EN ISO 9001:2000 in the scope of:
- a) general construction, civil engineering, road and motorway construction,
- b) industrial facilities construction,
- c) installation works.
  - transfer of risks to cooperation contracts concluded by the Company with producers, suppliers and subcontractors (product responsibility, responsibility for services, differences between the ordered and delivered assortment, price increases, etc.).

Irrespective of the above, the payment of unforeseen contractual penalties or indemnities may have a negative impact on the Companies' financial results. It should be noted, however, that in the years 2005-2020, the Companies did not incur any significant charges due to the risk related to penalties for non-performance, improper performance or untimely performance of the order.

- related to claims against the Companies on account of construction of flats and commercial and service facilities, sale of flats, and granting a guarantee of payment for construction works

Development activity consists in comprehensive implementation of residential buildings and houses construction projects, as well as the sale of residential units and houses. In order to implement numerous investments, the Company has concluded and will continue to conclude construction contracts with contractors for construction and finishing works. It should be noted that the obligations incurred by the contractors in connection with the execution of the investment (e.g. in relation to subcontractors) may consequently, due to the joint liability of the investor and the contractor for the payment of remuneration, be associated with the creation of claims against the Companies, which may affect the timeliness of the execution of the investment. As a result, the Company, which is accountable to its customers, may incur significant costs of non-performance or improper performance

of the contract. It cannot be precluded that in the future customers and business partners of the Companies will also not make claims against them due to hidden defects of the building arising at the stage of construction or finishing works, although according to the standard contracts concluded by the Companies, the costs of repairs of this type of defects are covered by the contractor or its subcontractors. The Companies are also liable to purchasers of apartments under the statutory warranty for physical and legal defects of buildings. The period covered by these claims is 3 years.

Moreover, pursuant to Articles 6491 – 6495 of the Civil Code, at the request of the contractor, the Company acting as an investor (general contractor) is obliged to grant a guarantee of payment to the contractor (general contractor) for construction works in the form of a bank or insurance guarantee, as well as a bank letter of credit or bank surety granted at the investor's request. The occurrence of any of the above factors, which translate into claims against the Companies, may have an adverse effect on the Group's activities, financial position or its development prospects.

#### - related to the production process

Construction contracts contain a number of clauses concerning proper and timely performance of the contract, proper removal of defects and faults, which involves the provision of a guarantee deposit or securing the contract with an insurance or bank guarantee. The security is usually provided in the form of an insurance guarantee, bank deposit or cash deposit within a specific period of time after the contract is signed and settled after the contract completion. The amount of the security depends on the type of contract. Typically, it is between 5 and 10% of the contract price.

As the necessity to lodge a security in the form of a deposit may have an impact on the limitation of the Company's financial liquidity, the Company prefers to lodge the security in the form of an insurance guarantee. If access to insurance or bank guarantees is restricted and the cost of obtaining them increases, the Company bears the risk of increasing the costs and freezing financial resources, which in turn may lead to a decrease in the Company's profitability or financial liquidity.

In order to minimise the risk, the Companies' contracts with subcontractors require subcontractors to secure proper performance of the contract in the form of an insurance guarantee, bank guarantee or cash deposit and contain contractual penalties for exceeding the contractual deadlines.

#### Note 41 Management of capital

The objective of capital risk management is to protect the ability to continue with the activities, so that returns for shareholders and benefits for other stakeholders can be performed, and to maintain an optimal capital structure in order to reduce the cost of capital.

The tools used to maintain and correct the capital structure may include:

- change in the amount of declared dividends to be paid;
- return of capital to shareholders;
- issue of shares and other capital instruments;
- the sale of assets in order to reduce debt.

Capital monitoring is carried out by means of the debt ratio. This ratio is calculated as the ratio of net debt to total capital. Net debt is calculated as the sum of financial debt (including current and long-term credits and loans and other financial debt disclosed in the consolidated balance sheet), less cash and cash equivalents. The total value of capital is calculated as equity disclosed in the consolidated balance sheet, together with net debt.

Calculation of the debt ratio

## XIII. NOTES TO CONSOLIDATED QUARTERLY REPORT

Description of material achievements and failures of the Issuer during the period covered by the report, along with information on related key events.

The most important achievements of the Issuer in the reporting period include:

Further filling of the order portfolio of the Issuer's Capital Group with the value of approx. PLN 5,500 million for 2020-2024 (approx. PLN 1,600 million for 2021).
 Conclusion of a contract for the construction of a section of the A-18 motorway, Olszyna - Gorlice, and the Voivodship Ambulance Station in Szczecin. The list of contracts concluded in the reporting period is presented in the table below.

Table: Significant contracts concluded by MIRBUD S.A. in the period from 01/01/2021 to 31/03/2021

| Contract conclusion date | Contract value (net) in PLN thousand | Contractor  | Subject matter of the contract   |
|--------------------------|--------------------------------------|---|--|
| 04/01/2021               | 27,579                               | G&M Sp. z o.o.  | Comprehensive execution of prefabrication of reinforcement and prefabrication of formwork for EST-1 flyover in connection with the investment titled "Construction of the S1 expressway (formerly S69) Bielsko-Biała - Żywiec - Zwardoń, Przybędza - Milówka section (Węgierska Górka bypass)  |
| 19/01/2021               | 55,946                               | Kujawsko-Pomorskie<br>Voivodeship - the Voivodship<br>Roads Authority in<br>Bydgoszcz | Extension of voivodship road No. 548 Stolno - Wąbrzeźno from km 0+005 to km 29+619, excluding the motorway interchange in the town of Lisewo from km 14+144 to km 15+146. Part 1 - stage I from km 0+005 to km 14+144."  • KOBYLARNIA S.A. with its registered office in Kobylarnia - a company from the Issuer's Capital Group (Consortium Leader);  • MIRBUD S.A. with its registered office in Skierniewice (Consortium Partner).   |
| 20/01/2021               | 26,174                               | Robert Białdyga<br>Przedsiębiorstwo Handlowo<br>– Usługowe TRANSKOM                   | Delivery of aggregate mixtures in connection with the investment titled "Design and construction of the Olesno bypass within the national road No. 11 (S11)."  |
| 27/01/2021               | 209,897                              | GDDKiA  | Construction of the A18 motorway Olszyna - Golnice (reconstruction of the southern roadway) section 4 from km 50+000 to km 71+533.  • KOBYLARNIA S.A. with its registered office in Kobylarnia - a company from the Issuer's Capital Group (Consortium Leader);  • MIRBUD S.A. with its registered office in Skierniewice (Consortium Partner);  • BUDPOL Sp. z o.o. with its registered office in Częstochowa, ul. Kopalniana 12J, 42-271 Częstochowa (Consortium Partner). |
| 03/02/2021               | 21,215                               | BAUME Sp. z o.o   | Execution of earthworks in connection with the investment titled "Design and construction of the Olesno bypass within the national road No. 11 (S11)."   |
| 09/03/2021               | 27,843                               | JHM DEVELOPMENT S.A.  | Construction of a multi-family residential building with necessary infrastructure at ul. Bohaterów Kragujewca 8A in Bydgoszcz  |
| 12/03/2021               | 26,700                               | Voivodship Ambulance<br>Station in Szczecin.  | Construction of the Voivodship Ambulance Station at ul. Twardowskiego in Szczecin.   |

On 31 March 2021, the Issuer received information from the Contracting Authority, the General Directorate for National Roads and Motorways, Poznań Branch, that in the tender procedure,

conducted in the open tender procedure titled "Design and construction of the Gostyń bypass within national road No. 12", the bid of consortium (hereinafter referred to as the "Consortium") of companies composed of:

- MIRBUD S.A. with its registered office in Skierniewice (Consortium Leader),
- KOBYLARNIA S.A. with its registered office in Kobylarnia (Consortium partner) was selected as the most advantageous one.

Bid value: PLN 200.677 thousand net.

Detailed terms and conditions of the above contracts do not differ from those commonly used in the market.

Moreover, the most important achievements of the Issuer in the reporting period included:

- strengthening the competitive position in the sector of warehouse facilities and logistics centres (continuing cooperation with PANATTONI EUROPE and other international warehouse space developers);
- maintaining, despite the state of epidemic, the commercialisation of CH MARYWILSKA
   44 sp. z o.o. at the level of over 90%;
- reorganisation of the MIRBUD Capital Group in the commercial real property leasing sector.

The Issuer did not record any significant failures in the reporting period.

Information on changes in the economic situation and operating conditions having a material effect on the fair value of financial assets and liabilities

In the reporting period there were no changes in the economic situation and operating conditions in the Capital Group's Companies having a material effect on the fair value of the Issuer's financial assets and liabilities.

Information on failure to repay a credit or loan or breach of material provisions of a loan or credit contract which has not been remedied by the end of the reporting period

During the reporting period, there were no defaults in payment of credits or loans or breaches of material provisions of a credit or loan contract within the Capital Group's Companies in respect of which no remedial action had been taken by the end of the reporting period

Description of factors and events, especially of extraordinary nature, having significant effect on the achieved financial results.

Extraordinary factors and events with a significant effect on the achieved financial results in the reporting period did not occur. Other factors and events, especially of extraordinary nature, having effect on the achieved financial result are described in Note No. 40.

Explanations regarding seasonality or cyclicality of the Issuer's operations in the presented period.

No seasonality or cyclicality with regard to the conducted operations occurred in the presented period.

Information on issue, redemption and repayment of non-equity and equity securities.

In the reporting period, the Issuer did not issue, redeem or repay any debt or equity securities.

Events subsequent to the date of the consolidated extended financial statements for Q1 2021 which have not been included in these statements but may have a significant effect on the Issuer's future financial results.

The following events occurred after the date of the consolidated extended financial statements for Q1 2021 which have not been included in these statements but may have a significant effect on the Issuer's future financial results:

|            |         | 00000  |  |

Net Contract value: PLN 72,370 thousand.

The effects of changes in the structure of the economic entity, including as a result of merging entities, gaining or loss of control over subsidiaries and long-term investments, as well as division, restructuring or discontinuation of operations, and indication of entities subject to consolidation.

There were no changes in the Capital Group's organisational structure during the reporting period.

The Issuer prepares consolidated financial statements. The entities subject to consolidation have been indicated by the Issuer in this report under "Subsidiaries and consolidation methods"

Position of the Management Board with respect to the possibility of delivery of forecast results published earlier for a given year, in the light of the results presented in the report for the

#### previous period in relation to the forecast results.

In the period covered by this report, the Issuer did not publish forecasts, and the indicated period was not covered by forecasts published in previous periods.

Shareholders holding, directly or indirectly through subsidiaries, at least 5% of the total number of votes at the Issuer's General Meeting as at the date of submitting the consolidated quarterly report.

Information is presented in Note No. 12 - Capitals to the Consolidated Extended Financial Statements of the MIRBUD Group for the period from 01/01/2021 to 31/03/2021.

#### Information on changes in shareholders holding more than 5% of the Issuer's shares.

Information is presented in Note No. 12 - Capitals to the Consolidated Extended Financial Statements of the MIRBUD Group for the period from 01/03/2021 to 31/03/2021.

Summary of number of shares of the Issuer or the rights to them held by managers and supervisors of the issuer as at the date of the report, together with an indication of changes in ownership during the period of the previous report, separately for each person.

Information is presented in Note No. 12 - Capitals to the Consolidated Extended Financial Statements of the MIRBUD Group for the period from 01/03/2021 to 31/03/2021.

None of the members of the Management Board or Supervisory Board hold any options for the Company's shares.

Information about pending material proceedings regarding liabilities or receivables of the Issuer pending before court, competent arbitration authority or public administration authority.

As at the date of the report, there were no material proceedings regarding liabilities or receivables of the Issuer pending before any court, competent arbitration authority or public administration authority.

On 25/02/2020, KOBYLARNIA S.A. as the leader of the consortium filed a lawsuit against the GDDKiA for the value of the object of dispute of PLN 67,422 thousand, including a claim for indexation of the Consortium's remuneration in connection with the performance of investment development tasks: the Inowrocław bypass (connector), the Bolków bypass, construction of a section of the S-5 expressway. The total value of disputes between KOBYLARNIA S.A. and GDDKiA as at 31/12/2020 amounted to PLN 71,820 thousand.

Information on court proceedings is presented in Note No. 38 - Litigation to the Consolidated Extended Financial Statements of the MIRBUD Group for the period from 01/01/2021 to 31/03/2021.

## Information on material settlements under litigation

There were no material settlements under litigation in the reporting period.

Information about the conclusion by the Issuer or its subsidiary of one or more transactions with affiliates, if they are individually or jointly significant and were concluded pursuant to non-arm's length conditions.

During the period covered by the report and until the report publication date, the Issuer and its subsidiaries did not conclude any transactions with affiliates which were individually or jointly significant and were concluded pursuant to non-arm's length conditions.

Information on credit or loan sureties or guarantees granted by the Issuer or its subsidiary - jointly to one entity or its subsidiary.

Information is presented in Note No. 39 - Contingent liabilities to the Consolidated Extended Financial Statements of the MIRBUD Group for the period from 01/01/2021 to 31/03/2021.

# Information on factors which, in the opinion of the Issuer, would affect its results in the perspective of at least the next quarter.

Revenue of the MIRBUD Group are earned entirely on account of conducting business activity on the Polish market. Therefore, the financial results achieved depend on factors such as the stability of the macroeconomic situation in Poland and the general economic situation in the country in a given period.

The most important factor influencing the development is the situation in the domestic construction sector, which directly depends on the rate of GDP growth, the level of domestic investments, or the competitive position of Companies from the MIRBUD Group determining their ability to win contracts and customers. This, in the opinion of the Management Board of the parent, will in turn primarily depend on:

#### External factors

- further implementation of the investment using the EU funds,
- the economic situation in the countries of the European Union,
- the government's policy on construction, especially housing,
- monetary policy (interest rate policy and its impact on the cost of credits),
- situation on financial markets,
- availability and costs of bank credits and guarantees,
- trends in preferences of potential buyers of apartments,
- the level and conditions of competition,
- the rate of growth of investments in the public sector (in particular in road construction),
- price levels for construction materials and services.
- the availability on the market of qualified staff and the level of their salaries,
- demand in housing construction,
- the further course of the coronavirus pandemic and the related economic effects, including a slowdown in the economy, increased unemployment, higher inflation, and an impact on the trade sector.

#### Internal factors

- financial standing of the Companies of the Group, in particular MIRBUD S.A.,
- a well-established position in the industrial building construction sector,
- systematic development of the Group in the engineering and road sector,
- systematic filling of the portfolio for the years 2020 2024,
- diversified order portfolio for the years 2020 2024,
- further development of developer activity through implementation of projects in Katowice,
   Rumia, Konin, Bydgoszcz, Łódź and Zakopane,
- commercialisation and rent collection in CH MARYWILASKA 44 sp. z o.o. after the period of trade suspension due to the coronavirus pandemic.
- the level of margin on the execution of contracts achieved through optimisation of production costs and improvement of technical solutions for the execution of construction, also thanks to the implementation of the process of development and implementation of the IT management system (a modern management system, in the Issuer's opinion, will improve control over operating activities through detailed ongoing analyses of individual projects, improve financial records, positively affect work efficiency and reduce the risk of core activities),
- the level of sales of residential units in ongoing development projects,
- further investments in modern machinery park,
- achieving financial results consistent with the planned results by the Group's subsidiaries.

# XIV. APPROVAL FOR PUBLICATION

The financial statements were approved for publication and signed by the Management Board on 27/05/2021.
